****These applications list frequencies presently authorized by the FCC for LightSquared's use to be operated from Sprint's antennas. Sprint has entered into an agreement to host LightSquared's network on its system and to use frequencies assigned to LightSquared. The Federal Communications Commission (FCC) has issued a Public Notice prohibiting LightSquared from commencing operations on its assigned frequencies until the FCC, in consultation with the National Telecommunications and Information Administration (NTIA), finds that Global Positioning System (GPS) interference concerns have been satisfactorily resolved. Consequently, we condition our recommendation on approval from the FCC for use and activation of service for those frequencies and assignment of those frequencies by Light Squared to Sprint.**
