

MARYLAND-NATIONAL CAPITAL PARK & PLANNING COMMISSION

Agency Description

The Maryland-National Capital Park and Planning Commission, a bi-county agency serving both Montgomery and Prince George's counties, was established in 1927 by the Maryland State Legislature. The M-NCPPC provides regional planning services, operates a park system for residents of the two counties, and delivers recreational services to the residents of Prince George's County.

Facilities

In Prince George's County, the Department of Parks and Recreation administers over 25,730 acres of parkland. In accordance with M-NCPPC policy, extensive park areas are being left in their natural state to help preserve the ecological balance and the natural beauty of the area. The Department offers the public a variety of facilities at both the local and regional levels in conjunction with professionally designed programs through which these facilities may be enjoyed. Current facilities include regional parks, golf courses, recreation centers, neighborhood/community parks, stream valley parks and special facilities.

Needs Assessment

The Department of Parks and Recreation uses "Level of Service Analysis" to assess park acreage and recreation facilities needs throughout the County on an ongoing basis. The County is divided into 32 geographic units called "communities." A considerable amount of statistical demographic data is available by community. A continuous update of the park inventory allows planners to determine the amount of park and open space acreage per thousand people in each community. The communities are then put into rank order for need, with those that have fewer acres per thousand populations showing a greater immediate need for the acquisition of additional park acreage.

The same type of analysis is also used for recreation facility development. Instead of using standards, such as one tennis court for every X thousand people, carrying capacity figures are assigned to facilities. These figures represent the maximum number of people who can use a facility in a day

without significant degradation in the quality of the experience due to crowding. The facilities inventory determines the number of recreation facilities in each community. These facility totals are converted to carrying capacities, and the communities are ranked according to need. Those communities with lower total carrying capacities per thousand populations show a greater immediate need for additional development of recreation facilities. The level of service methodology is utilized to encourage the equitable distribution of park and recreation resources based on need.

Projects in this year's Capital Improvement Program were selected in conjunction with the Level of Service Program as described in the Parks, Recreation and Open Space Master Plan (PROS Plan). Also considered are requests made at the annual Budget Forum, held in October, and citizen requests made throughout the year. Of additional concern in the selection of projects is the impact of operation and maintenance costs. Special emphasis is placed on the acquisition of stream valley parks (SVP), which provide connecting links to communities with areas for active and passive recreation, future trails and floodplain protection.

FY 2010 Funding Sources

- State Funding –3% (Program Open Space Grants)
- PAYGO – 86.7% (Operating Fund Balance)
- MNCPPC Bonds – 8%
- Grants – .6% (Community Development Block Grants)
- Dev/Other–1.7% (Developer and private contributions)

FY 2010-2015 Program Highlights

- The grand total for Park Acquisition and Park Development for FY 2010 is \$95,681,000. Projects for FY 2010 are funded from the following sources: Program Open Space, Operation Fund Balance (PAYGO), Grants, Bond Sales, and Developer Contributions.
- Projects for the budget year 2010 include carryover projects that have prior funding, ongoing projects such as playground equipment replacement, community center renovations, projects

THE PRINCE GEORGE'S COUNTY FY 2010-2015 PROPOSED CAPITAL IMPROVEMENT PROGRAM

with special funding and projects that are new to the CIP. The law requires that the CIP be submitted to the County Executive by November 1 each year.

- A primary objective for the Department of Parks and Recreation in developing the FY 2010-2015 CIP is to remain within the designated bonding capacity and not exceed projected FY 2010 State Program Open Space allocation.
- The total cost for proposed park acquisition is \$13,500,000 for FY 2010 and includes the cost for three projects that will be funded by Program Open Space and PAYGO funds. The majority of land acquisition projects are combined into Countywide Local Park Acquisition and Regional/Stream Valley Park Acquisition. Combining these projects into these two categories provides the Commission with greater flexibility in making land purchases.
- To provide a neutral negotiating environment when Commission staff engages in property acquisition, the amount of funds appropriated for each land acquisition project has not been printed in the CIP document. Instead "x" is indicated where normally a numeric figure and the appropriated amount would appear.
- The total cost for approved park development is \$82,181,000 for FY 2010. This covers 49 specific park development projects and 11 general renovation projects that cover the cost to renovate community centers, playgrounds, trails and other public facilities.
- For presentation purposes, projects costing less than \$75,000 are combined into Minor Park Development Projects. These projects are listed on the following page:
