September 4, 2009

Mr. Kenneth Glover, Chair
Prince George's County Hospital Authority
PO Box 6779
Largo, MD 20792

Dear Mr. Glover:

It is my understanding, as stated in a letter addressed to the public dated May 21, 2009, the Authority was to enter final negotiations with the intention of having firm bids for the transfer of the hospital system by August 1, 2009. The purpose of this letter is to obtain the name(s) of the bidder(s) in order to contact the final bidder for Prince George's Hospital Center. Ijomah and Associates is interested in providing Behavioral Health Services at this Center.

My organization, registered in Maryland as a minority business enterprise, has provided successful Behavioral Health Services to residents of Prince George's County for six years. We believe we are well qualified to operate the emergency psychiatric services, inpatient care, partial hospitalization and sexual assault center. Thus, we would like to put forth a proposal to operate these components of the system.

At this time, *New Vision Behavioral Health* would like to have the opportunity to address the Hospital Authority to share our proposal and to establish a relationship with the entity selected to operate Prince George's County Hospital in Cheverly. Please advise as to how to proceed with this proposal. We look forward to hearing from you.

Sincerely,

Ben Ijomah
President
