

She has COVID-19 but doesn't know it. She is not showing symptoms.

He's had a fever and a cough for a few days, but figures he'll get better soon.

She is taking care of her father who suffers from heart disease.

**HUGS ARE AWESOME,  
BUT NOT RIGHT NOW.**

# KEEPING YOUR DISTANCE SAVES LIVES.

Limiting close contact with others reduces the spread of COVID-19. What experts fear most is a sudden burst of COVID-19 illness that overwhelms the health care system, requiring more people to be hospitalized than it can handle.

**Stay home. Save lives.**
