PRINCE GEORGE'S COUNTY

COVID-19 VACCINE REMINDERS

COVID-19 vaccinations at County Health Department clinics are available by appointment only for individuals who live or work in Prince George's County.

To receive an appointment, you must pre-register at:
<https://bit.ly/PGCVaccineForm>

Pre-registration is not an appointment, so please do not show up after pre-registering. You will be contacted by the Health Department to schedule an appointment as they become available.

For those who are currently eligible to receive a vaccine based on the County's phased distribution plan, it may take several weeks or longer to receive an appointment after pre-registering, due to the limited supply of vaccines.

Walk-ups are not permitted and anyone who shows up without an appointment will be turned away.

When you come for your scheduled appointment, make sure you bring proof of residency and/or proof of employment.
