

New Requirement Helps Streamline the Permit Process for Residential Fences

DPIE's Site/Road Plan Review Division (SRPRD) has streamlined permitting procedures for Residential Fence Permits by designing a form that establishes when a permit review is needed or not needed by the SRPRD. The landowner is required to sign and submit the new "[Residential Fence/Gate Owner Certification](#)" form for all residential fence permits. This form will help shorten the timeframe for residential fence permits by predetermining the review steps in order to keep the permit moving forward.
