

DON'T PUT IT IN THE BIN

Whether recycling at work or at home, pay close attention to place appropriate materials in the correct container. Contamination is costly; causing loss of valuable natural resources and revenue. Last year the County paid thousands of dollars in fees due to damages caused by unacceptable materials being tossed in recycling containers. Pay close attention to posters and information above or on each recycling receptacle, most are marked with the acceptable items.

Unacceptable items include:

- ▶ Food
- ▶ Plastic bags and wraps
- ▶ Plastic utensils
- ▶ Tissues and paper towels
- ▶ Chip bags

Contamination is costly; remember when in doubt leave it out!
