

# Family Advisory Council

## What is the Family Advisory Council?

Maryland Coalition of Families has partnered with Prince George's County Health Department to create a family advisory council of caregivers who want to help inform and influence policy and practice in Prince George's County.

## Who can join the Council?

The Council is looking for caregivers who have children with or have experienced behavioral health (i.e., substance abuse, mental health) challenges. The Council wants to hear from individuals willing to share their experience with what works well, and in what areas the county can make improvements in behavioral health services and support for our youth.

## Where will the Council be meeting?

Central location to be determined.

## When will the Council need members?

Meetings are scheduled to tentatively begin in April.

## How can someone learn more?
