Re: Property: 4613 Rinard Avenue
Beltsville, MD 20705
Borrower: N/A N/A
File No.: 1902010

In accordance with your request, we have appraised the above referenced property. The report of that appraisal is attached.

The purpose of this appraisal is to estimate the market value of the property described in this appraisal report, as improved, in unencumbered fee simple title of ownership.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such as the subject. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice.

The value conclusions reported are as of the effective date stated in the body of the report and contingent upon the certification and limiting conditions attached.

It has been a pleasure to assist you. Please do not hesitate to contact me or any of my staff if we can be of additional service to you.

Sincerely,

Jacquelin Sonceau

Market Area Comments: The subject's neighborhood is bordered by Konterra Drive to the north; Baltimore-Washington Pkwy to the east; I-495 to the south; Cherry Hill Road to the west. No apparent adverse factors were noted that could affect the subject's marketability. Good access to all amenities, including public schools of all levels, churches, shopping, employment, and major highways. Major employment centers in the Baltimore DC metro area are within typical commuting times. The subject is less than a mile (as the crow flies) from High Point School. Market conditions are stable. Currently conventional, VA, and FHA mortgages are available at historically low rates. Median days on the market for properly priced properties in the overall subject neighborhood is under 3 months. Market trend data supplied above was obtained from the general market for the past twelve months within a 2 mile radius of the subject property.

- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the *Uniform Standards of Professional Appraisal Practice*.
- I have made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.

Definition of exposure time, per the Appraisal Institute: "Exposure Time" is: The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market.

All five comparable sales are over 1 mile from the subject property. This distance is farther than standard search parameters but it was necessary to expand this parameter to find comparables that were similar in overall appeal, design, condition, utility, and amenities. The sales presented were considered the best available.

The comparable sales used in this report have not all closed within the past 90 days of the effective date of the appraisal, and/or are within 1 mile of the subject. The comparables used were the best available to the appraiser, as of the date of the inspection.

Per brightMLS, the neighborhood housing trend has been stable over the past 12 months, therefore, no time adjustment is warranted to the comparable sales.

The subject site is land-locked, so the street with the closest access was near Elizabeth Street and Quimby Avenue.

COMMENTS ON SALES COMPARISON

The comparables presented are considered the best available featuring design, appeal, condition, utility, and amenities similar to the subject property. Other comparables analyzed would require less desirable adjustments and were not utilized for that reason. The comparables recited are from the subject neighborhood, are in acceptable proximity to the subject, are recent, and the most comparable sale and listing found. All value affecting dissimilarities were adjusted according to market reaction. The indicated range of values brackets the value of the subject. Features regarding each comparable is listed below.

COMPARABLE #1: recent sale; in close proximity of subject; raw land, similar to the subject; similar utility as the subject; similar zoning;

COMPARABLE #2: recent sale; in close proximity of subject; raw land, similar to the subject; superior utility compared to the subject warranting a negative adjustment, because utilities are available; similar zoning;

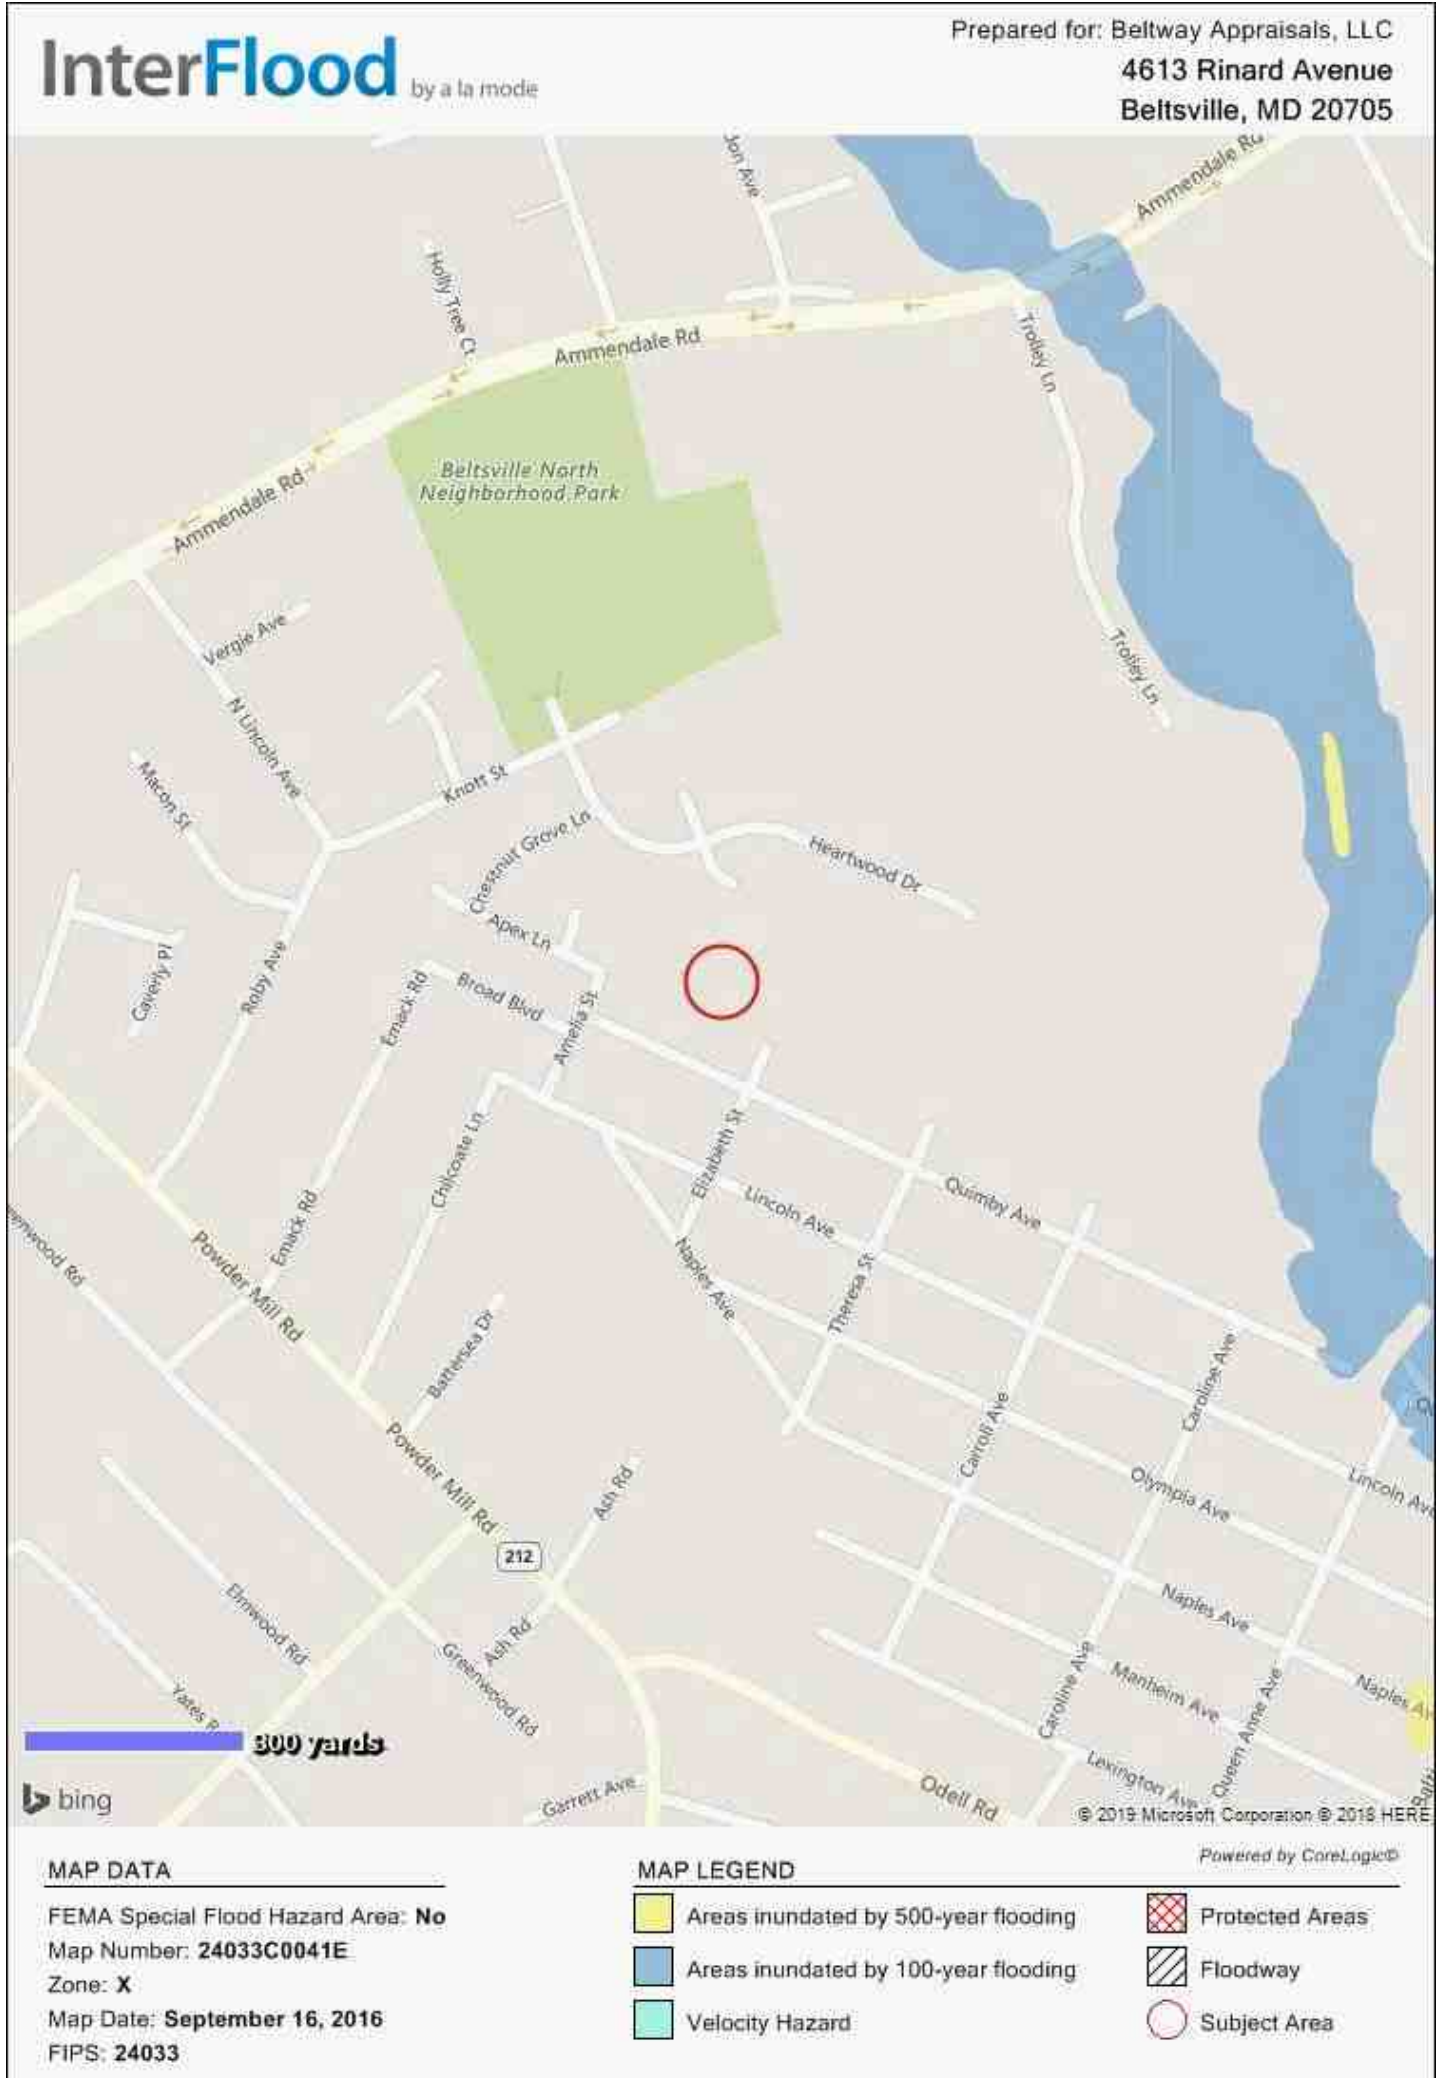

COMPARABLE #3: recent sale; in close proximity of subject; raw land, similar to the subject; superior utility compared to the subject warranting a negative adjustment, because utilities are available; similar zoning;

COMPARABLE #4: recent sale; in close proximity of subject and located in the same city; superior finished lot, warranting a negative adjustment; superior utility as compared to the subject warranting a negative adjustment, because utilities are available; same zoning as the subject;

COMPARABLE #5: recent sale; in close proximity of subject and located in the same city; superior finished lot, warranting a negative adjustment; superior utility compared to the subject warranting a negative adjustment, because utilities are available; same zoning as the subject;

Type: Feature Layer

Geometry Type: esriGeometryPolygon

Description: Targeted Ecological Areas (TEAs) are lands and watersheds of high ecological value that have been identified as conservation priorities by the Maryland Department of Natural Resources (DNR) for natural resource protection. These areas represent the most ecologically valuable areas in the State: they are the "best of the best". TEAs are preferred for conservation funding through Stateside Program Open Space. This version updates the 2008 TEA layer. The first step in updating TEAs was to create an ecological baseline composed of several ecological databases which included updates of original databases and additional databases developed since 2008. The first component is the updated Green Infrastructure Assessment (circa 2010) which identifies large, contiguous blocks (hubs) of significant forests and wetlands and their connecting corridors. The Green Infrastructure's hub and corridor network of habitat allows plant and animal migration, reduces forest fragmentation if protected, and provides important ecosystem services, such as biodiversity, cleaning air and water, storing nutrients, and protecting areas against storm and flood damage. The rare species and wildlife habitat component identifies areas that support Rare, Threatened, and Endangered Species, rare plant and animal communities, species of Greatest Conservation Need, and wildlife concentrations. The aquatic life hotspots component identifies watersheds supporting freshwater stream ecosystems where conservation is needed to protect and restore areas of high aquatic biodiversity, Tier II regulated streams, and brook trout streams. The water quality protection component identifies sensitive lands such as forests, wetlands, and steep slopes where preservation is important for water quality. The coastal ecosystems component identifies Blue Infrastructure shoreline and watershed protection priorities. These are areas important for sustaining coastal and tidal ecosystems and also identifies land areas important for sustaining spawning and nursery areas for important commercial and recreational fisheries. The climate change adaptation component identifies areas important for sustaining wetlands ecosystems that are changing and moving landward in response to sea level rise. From the ecological baseline, areas that ranked as most important for each of the components were merged to create the Targeted Ecological Areas. Lands that were developed, as identified by the Maryland Department of Planning (2010) were removed from the TEA layer since developed lands are not preferred for Stateside Program Open Space funding. Additionally, lands that are in the 0 foot to 2 foot inundation zone based on the 2011 SLAMM (Maryland Sea-Level Affecting Marshes Model) study performed for all 16 coastal counties and Baltimore City since these areas are not preferred for Stateside Program Open Space funding.

Brief Economic Facts

PRINCE GEORGE'S COUNTY, MARYLAND

Prince George's County wraps around the eastern boundary of Washington, D.C. and offers urban, suburban and rural settings. The region is served by three international airports and the Port of Baltimore. The county boasts a friendly business climate, skilled workers and an outstanding quality of life.

Prince George's County has one of the largest technology and aerospace sectors in the state and a growing hospitality sector. Major private employers include SGT, Inovalon, Verizon, and MGM National Harbor Casino and Resort. The county's private sector industries generate \$25.6 billion in economic output. The Brickyards, Woodmore Towne Centre and National Harbor are recent, high-quality mixed-use developments, and Westphalia Town Center is currently under development.

Prince George's County has significant federal facilities, such as Joint Base Andrews, NASA Goddard Space Flight Center, FDA, NOAA, USDA Beltsville Agricultural Research Center, and

the U.S. Citizenship and Immigration Services headquarters currently under construction. Academic facilities include the University of Maryland College Park, the state's flagship public university, and other major institutions. The county's commitment to business growth is reflected by the recent location or expansion of 2U and Kaiser Permanente of the Mid-Atlantic. The county's healthcare sector is also growing, led by the UM Capital Region Medical Center currently under construction.
