ELEVATE the voice of Prince George's County, improve access, and engage more communities.

Office of Highway Maintenance

Snow Operations

OPERATIONS

New district framework remains central, with route alignment and cross-district accountability built into the operating model.

PEOPLE

Snow training is underway; seasonal recruitment and countywide agency staffing commitments are being advanced.

TECHNOLOGY

Technology testing is in progress, including field testing and continued readiness validation ahead of the season.

PROCUREMENT

Vendor outreach and contract actions are focused on increasing available snow-equipment capacity and closing the asset gap.

READINESS FOCUS

CAPACITY

Validate contractor asset + agency staffing

READINESS

Train, field test + validate technology

ENGAGEMENT

Sustain procurement + stakeholder push

The first Dry Run Exercise is schedule for October 30, 2026

Office of Highway Maintenance

JOIN OUR TEAM

COUNTY VENDORS WANTED

DPW&T is seeking qualified **Snowplow Operators, Heavy Equipment Operators, and winter weather professionals** for the 2026-2027 winter season.

SCAN HERE

Register as a County Vendor Today at DPWT.MYPGC.US/

The Department of Public Works and Transportation (DPW&T) is seeking dedicated partners– **Heavy Equipment Operators, Snowplow Drivers, and winter weather professionals** to help us keep Prince George's County safe, clear, and connected during the 2026 – 2027 Snow Season.

Vendor registration is open from now through February 2027.

All vendors interested in submitting responses to procurements or any DPW&T solicitations must do so through the Ariba/SPEED eProcurement Platform - **not** the eMaryland Marketplace Advantage (EMMA).

Office of Storm Drain Maintenance

PRESENTER: Joanna Smith, Associate Director

VISIBLE RESULTS: Faster Response. Consistent Service. Clear Accountability.

Office of Storm Drain Maintenance: Hurricane Season Still Matters

BE FLOOD READY PRINCE GEORGE'S COUNTY!

Flooding can happen quickly — especially during high intensity summer storms, short-duration downpours, or hurricanes. Protect your home, family, and property by planning ahead.

BEFORE THE FLOOD

1. Remove leaves and debris from downspouts to allow water to drain properly.
2. Seal cracks in foundations, basement window wells, doors, and basement walls.
3. Sweep leaves and trash away from storm drains, curbs, gutters and swales in front of your home.
4. Put away movable lawn furniture and equipment.
5. Use yard waste services.
6. Stack sandbags or install pop up flood barriers to redirect water away from your home.
7. Install a grass swale to divert water from sidewalks or roads.
8. Install a sump pump with backup power.
9. Create a flood emergency kit with essentials.
10. Elevate valuables and electronics in waterproof/plastic containers.
11. Label gas and electric shut-off valves clearly.
12. Sign up for PGC Alerts: alert.mypgc.us
13. Report blocked or clogged storm drains: www.pgc311.com

DURING & AFTER THE FLOOD

- Monitor local weather reports through government sites such as NOAA or commercial sites such as weather.com.
- Get real-time updates by following @PGCountyDPWT and @PGFDNews on social media.
- Turn off your gas and electricity in case of water entry.
- Avoid driving or walking through flooded roads.
- Report any blocked inlets or damaged infrastructure to DPW&T through PGC311.

VISIBLE RESULTS: Faster Response. Consistent Service. Clear Accountability.

Office of Storm Drain Maintenance: Keep It Flowing

GRASS CLIPPINGS & LEAVES

Keep Them Out of the Street

Why It Matters

Grass clippings and leaves left in the street can:

- ✗ Clog storm drains, swales, ditches and roadside gutters
- ✗ Pollute local streams and rivers
- ✗ Create slippery, hazardous road conditions

Your Responsibility

- ✓ Keep the storm drain inlets, swales, ditches, curbs, and gutters adjacent to your property clear of leaves, grass clippings, and debris.

Simple Steps You Can Take

- ✓ Sweep or blow grass clippings back onto your lawn and off paved surfaces
- ✓ Bag or compost leaves and yard waste
- ✓ Keep gutters and storm drains free of debris
- ✓ Maintain drainage swales to ensure proper water flow

Remember

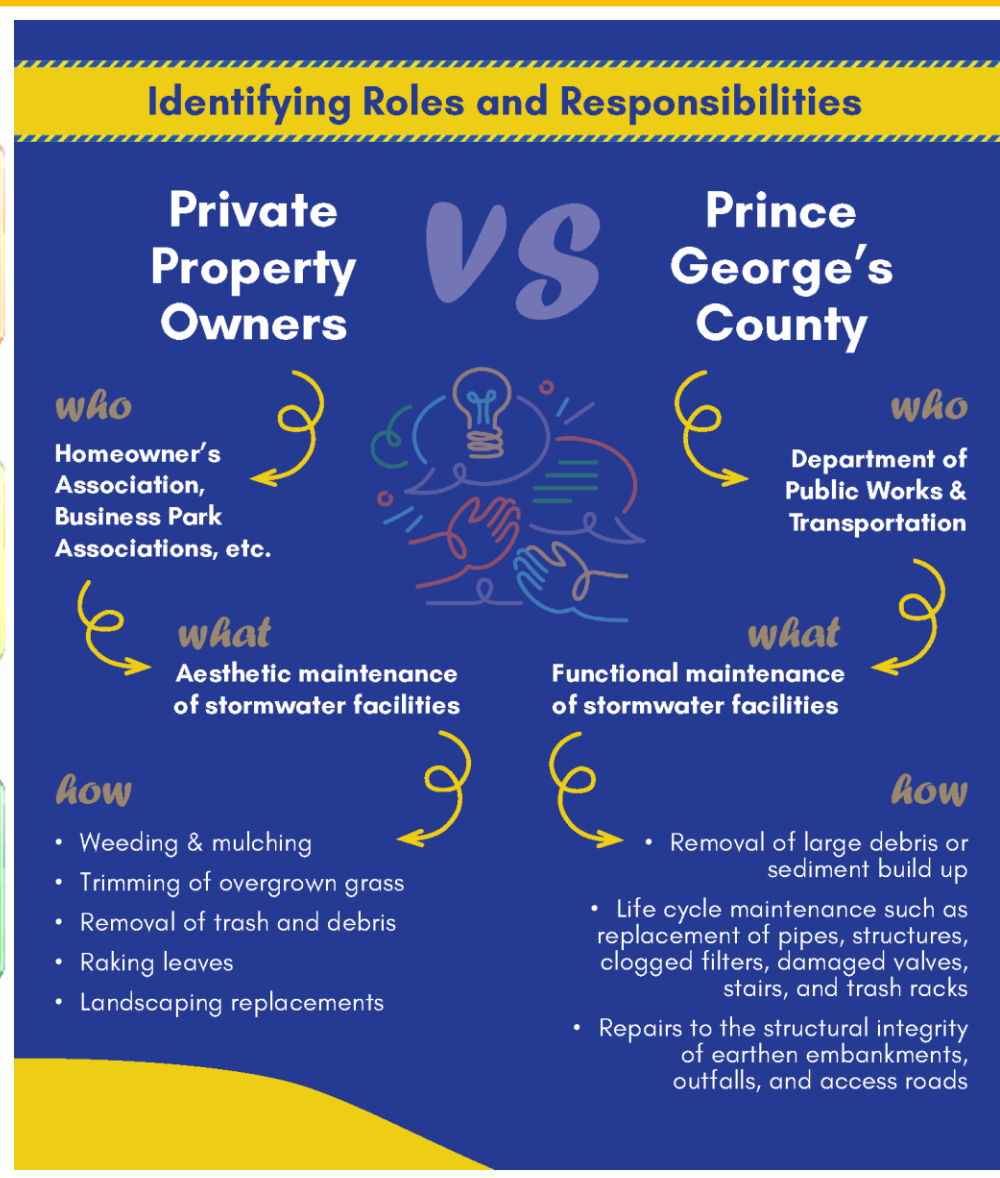

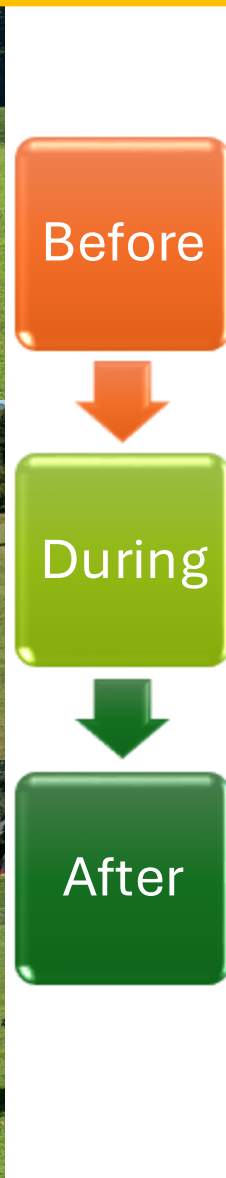

Leaves and clippings in the street become stormwater pollution. Help protect our neighborhoods and waterways by keeping them out of the gutters and storm drains.

PAMS, Asset Management, Sidewalk System

Field Collection

- Surveyed County maintained sidewalks throughout the County
- Specialized equipment captured images and condition data
- 1,856 miles sidewalk surveyed (100% completed)

Detailed Review

- Sidewalks divided into 4-foot sections for evaluation
- Reviewed for cracks, uneven areas, trip hazards, obstructions, and other concerns
- Sidewalks, driveways, and pedestrian ramps identified during the review

Condition Score

- Information is combined to give each sidewalk segment a 0-100 condition score
- Scores provide a consistent way to compare sidewalk conditions
- Results help identify areas most in need of repair or improvement

Office of Transportation

PRESENTER: William Proctor, Chief Transit Operations

VISIBLE RESULTS: Faster Response. Consistent Service. Clear Accountability.

THE LOGOS

GoPGC New Logos, New Look

THE BRAND

Our Rebranding did not begin with logos, but with questions, **who are we, who do we serve, and how do we want to be remembered.**

From there, every choice became intentional.

Colors were not just for beauty, but for emotional community connection and accessibility, and we narrowed to a palette that felt timeless. Logos were adjusted until the design felt intuitive rather than forced.

In the end, the new identity does not feel like a change, but a true expression of what we were all along.

Our Brand, Reimagined with Intention!
