

DCA South of Airport Aircraft Noise and Mitigation Study

Community Engagement Survey - Results

Community Engagement Survey

A community engagement survey was published in an effort to collect resident input related to community impacts associated with DCA flight operations. The data collected in the survey was compiled and shared with the Project Design Team who is helping identify strategies and flight procedure changes intended to reduce aircraft noise impacts for communities south of DCA.

A total of 2,599 submissions were collected. Because the intent of the survey was to collect input from those communities south of DCA, specifically residents of the City of Alexandria, Fairfax County and Prince Georges County, only responses from those jurisdictions were included in the analysis and summary.

Not all submissions included valid responses for every question. Each of the questions included in the survey are listed in the following slides, along with a breakdown of the responses and total responses counted.

Questions about the survey results may be directed to SOA@vianair.com.

You may also visit the project website: www.vianair.com/soa for more information about the project.

Community Engagement Survey - Results

DCA South of Airport Community Engagement Survey ..

The City of Alexandria, Fairfax County, and Prince George's County are working together in an effort to reduce aircraft noise impacts in communities south of the Ronald Reagan Washington National Airport (DCA). Community input is critical to this effort to ensure that residents' concerns and impacts are understood.

As part of the community engagement effort, we invite residents in neighborhoods south of DCA to participate in this survey. The information from this survey will be shared with the Project Team for consideration as airspace and flight procedure changes are evaluated. We appreciate your time and input.

Information about this project is available on the project website at: <https://www.vianair.com/soa/>

You may also email the project team at: SOA@vianair.com

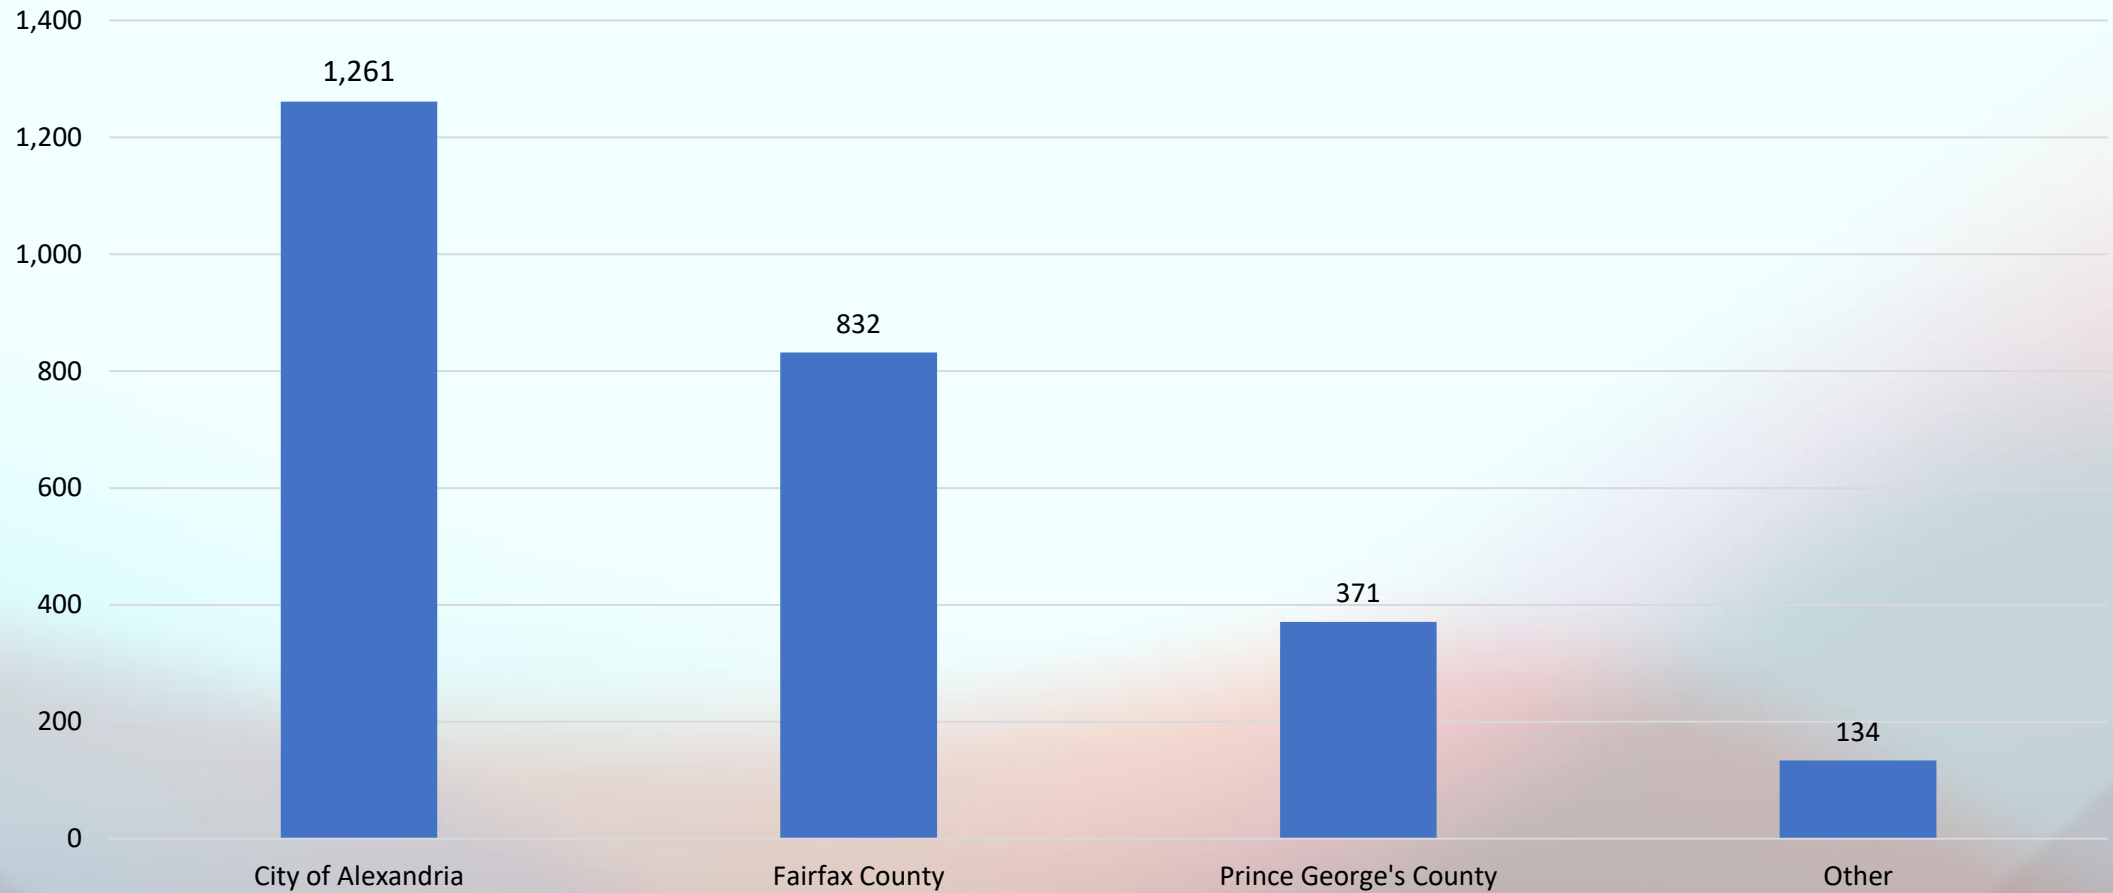

Note: The survey will close on July 31. Input received will be compiled and published in a summary report which will be available on the project website. This information will also be shared with the project Steering Committee and Design Team to inform next steps in the project.

Thank you for your input!

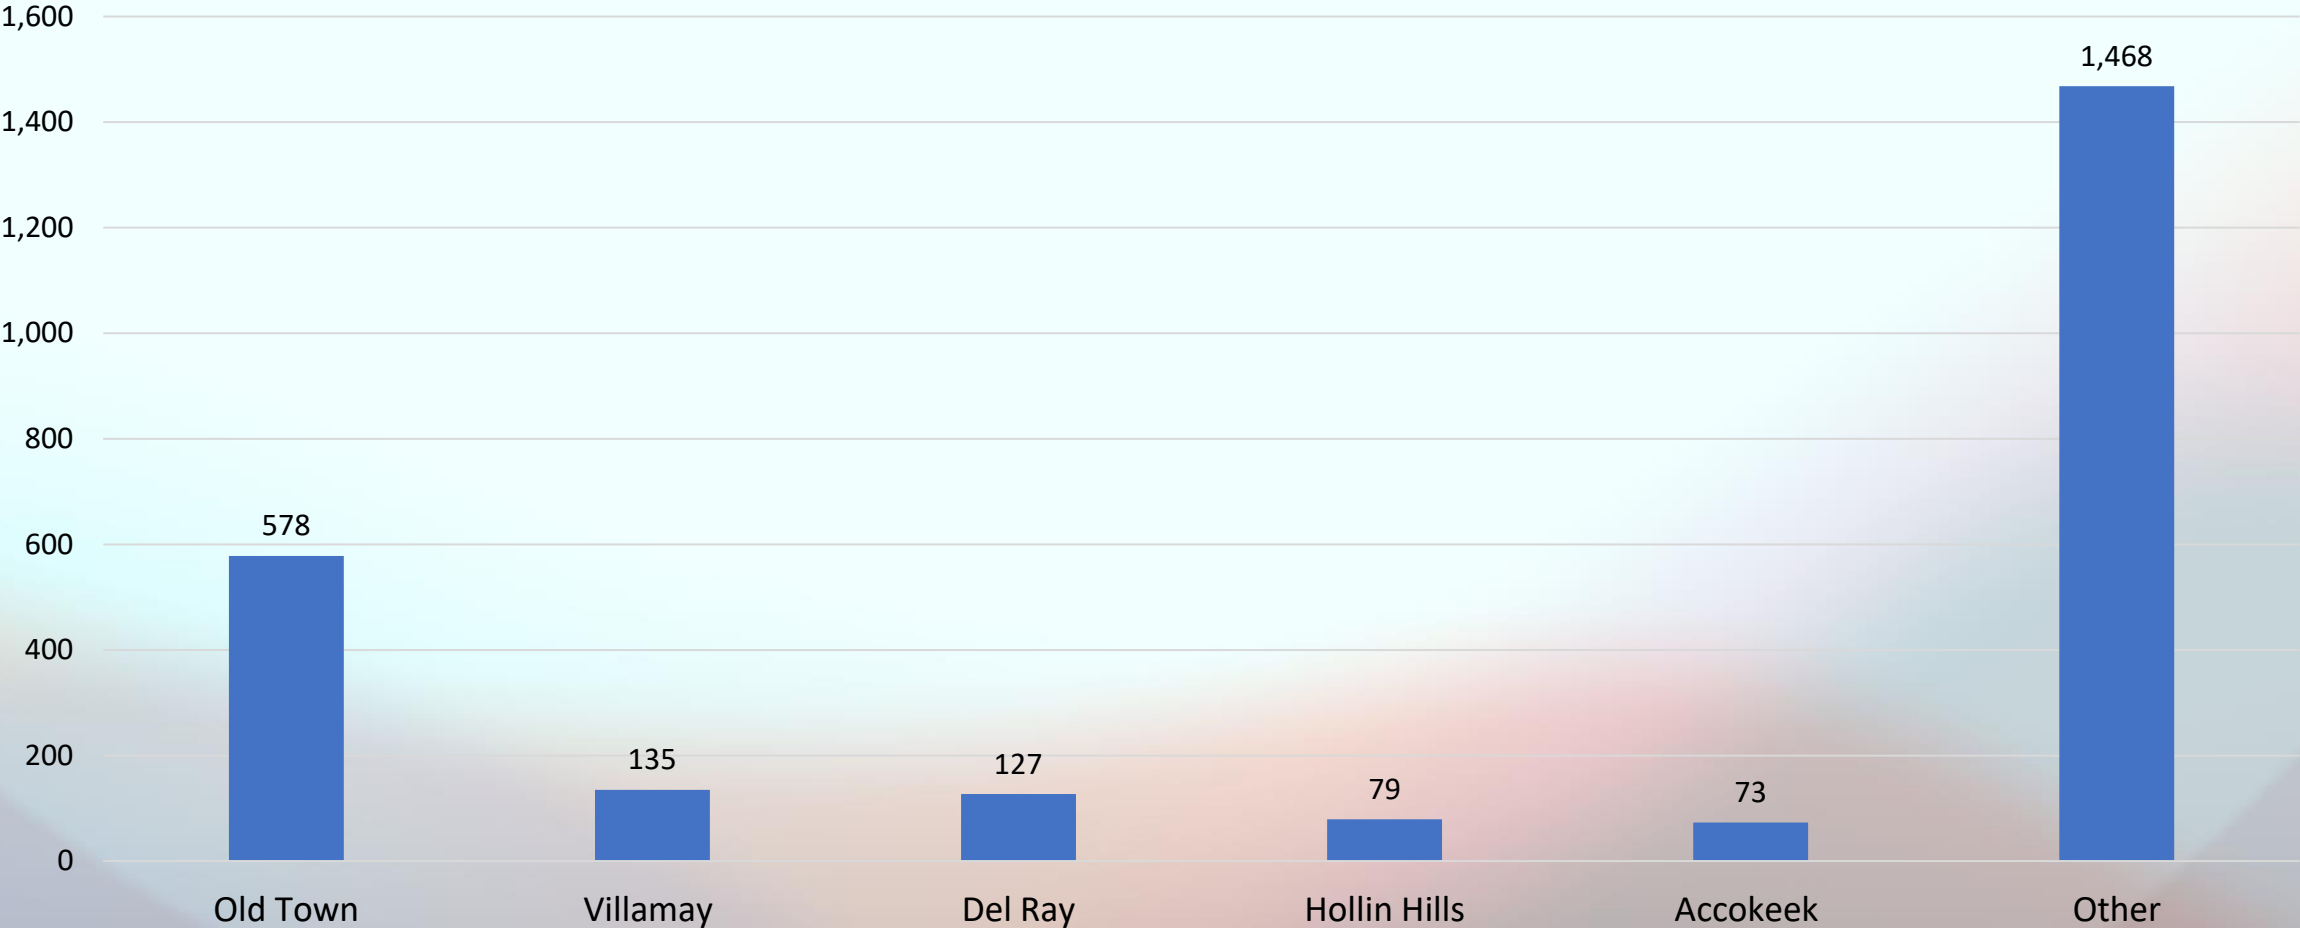

Survey Open: 4/15/24 – 8/31/24

Submissions by Jurisdiction

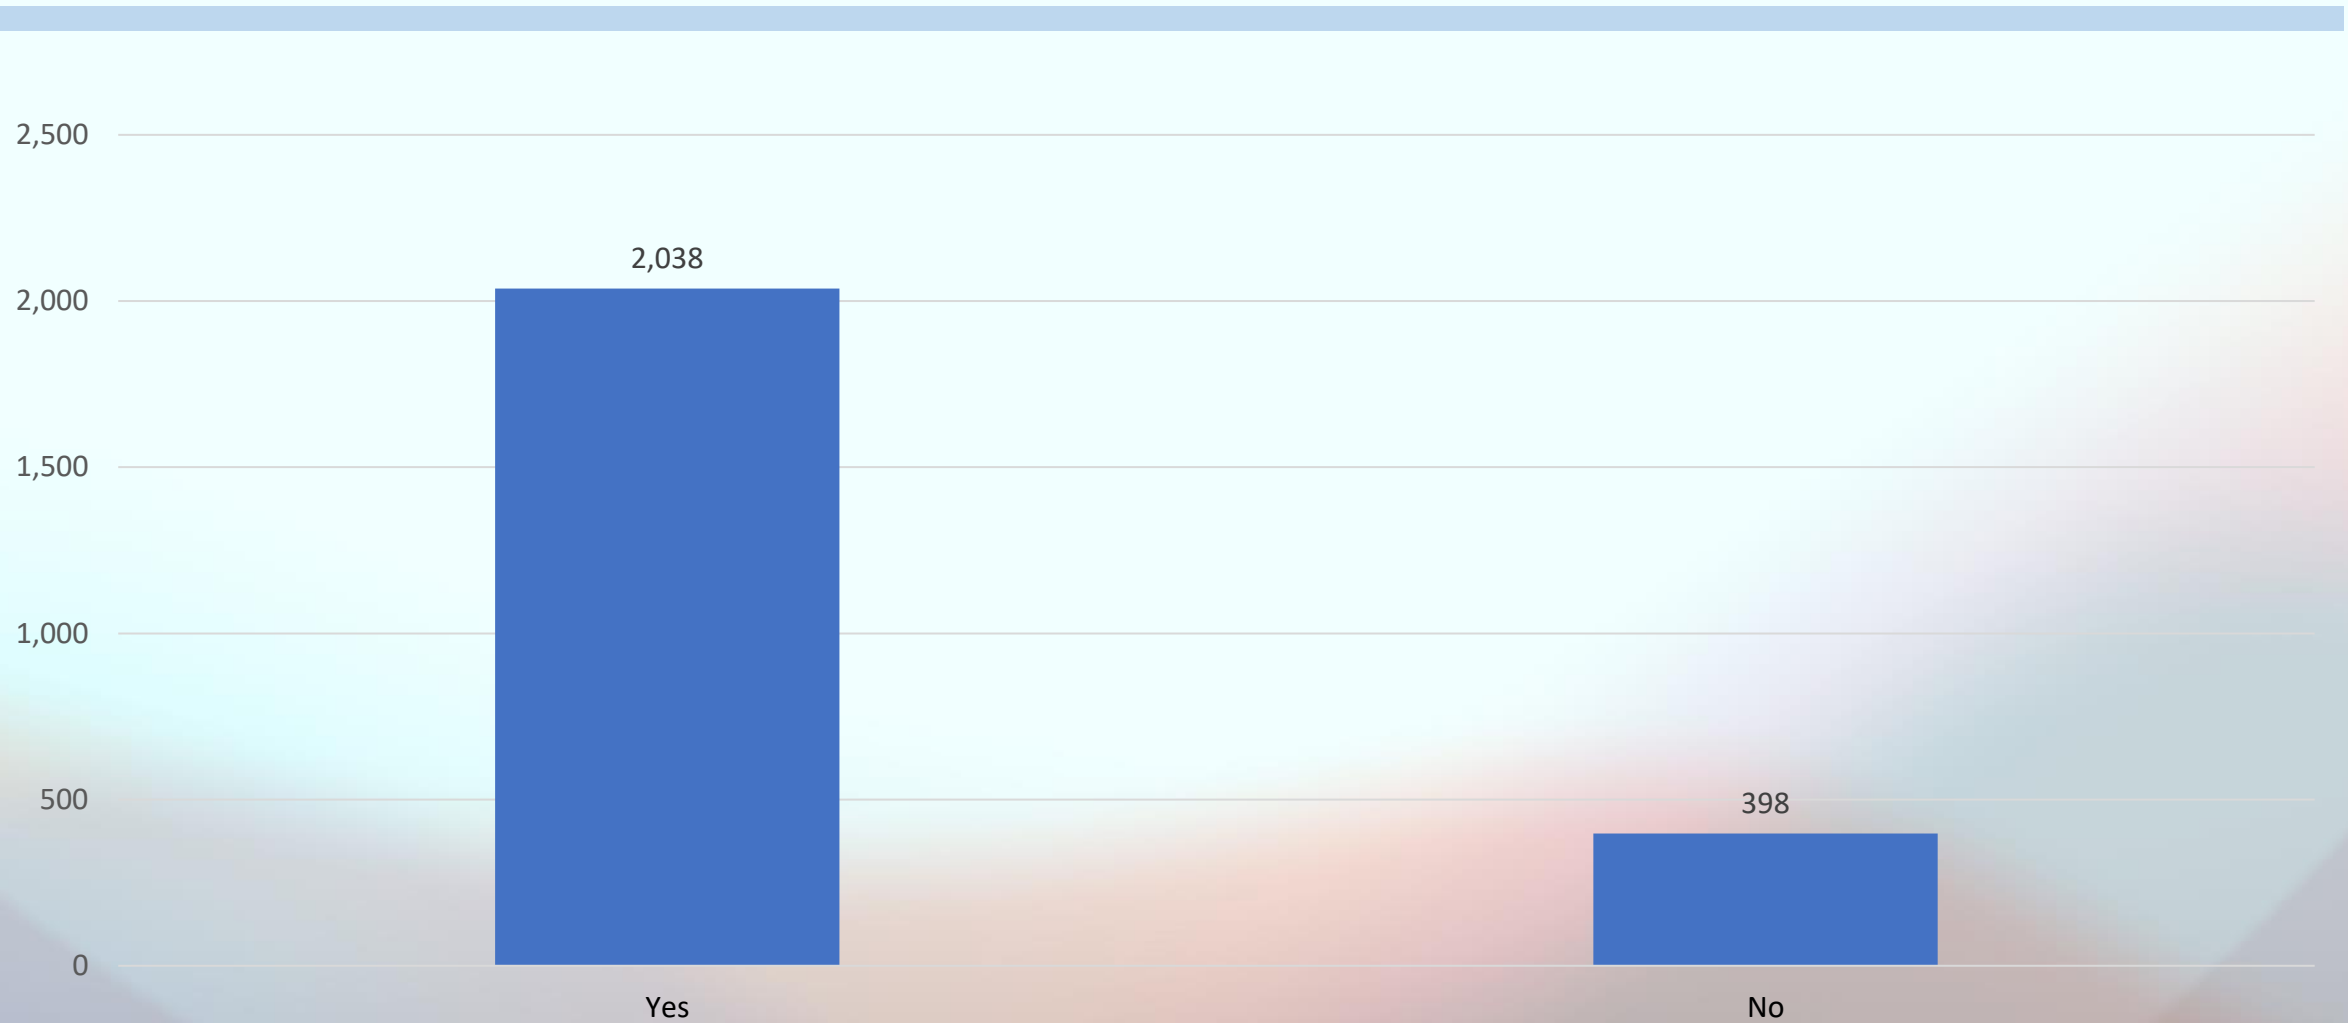

Total Responses: 2,598

Submissions by neighborhood / community

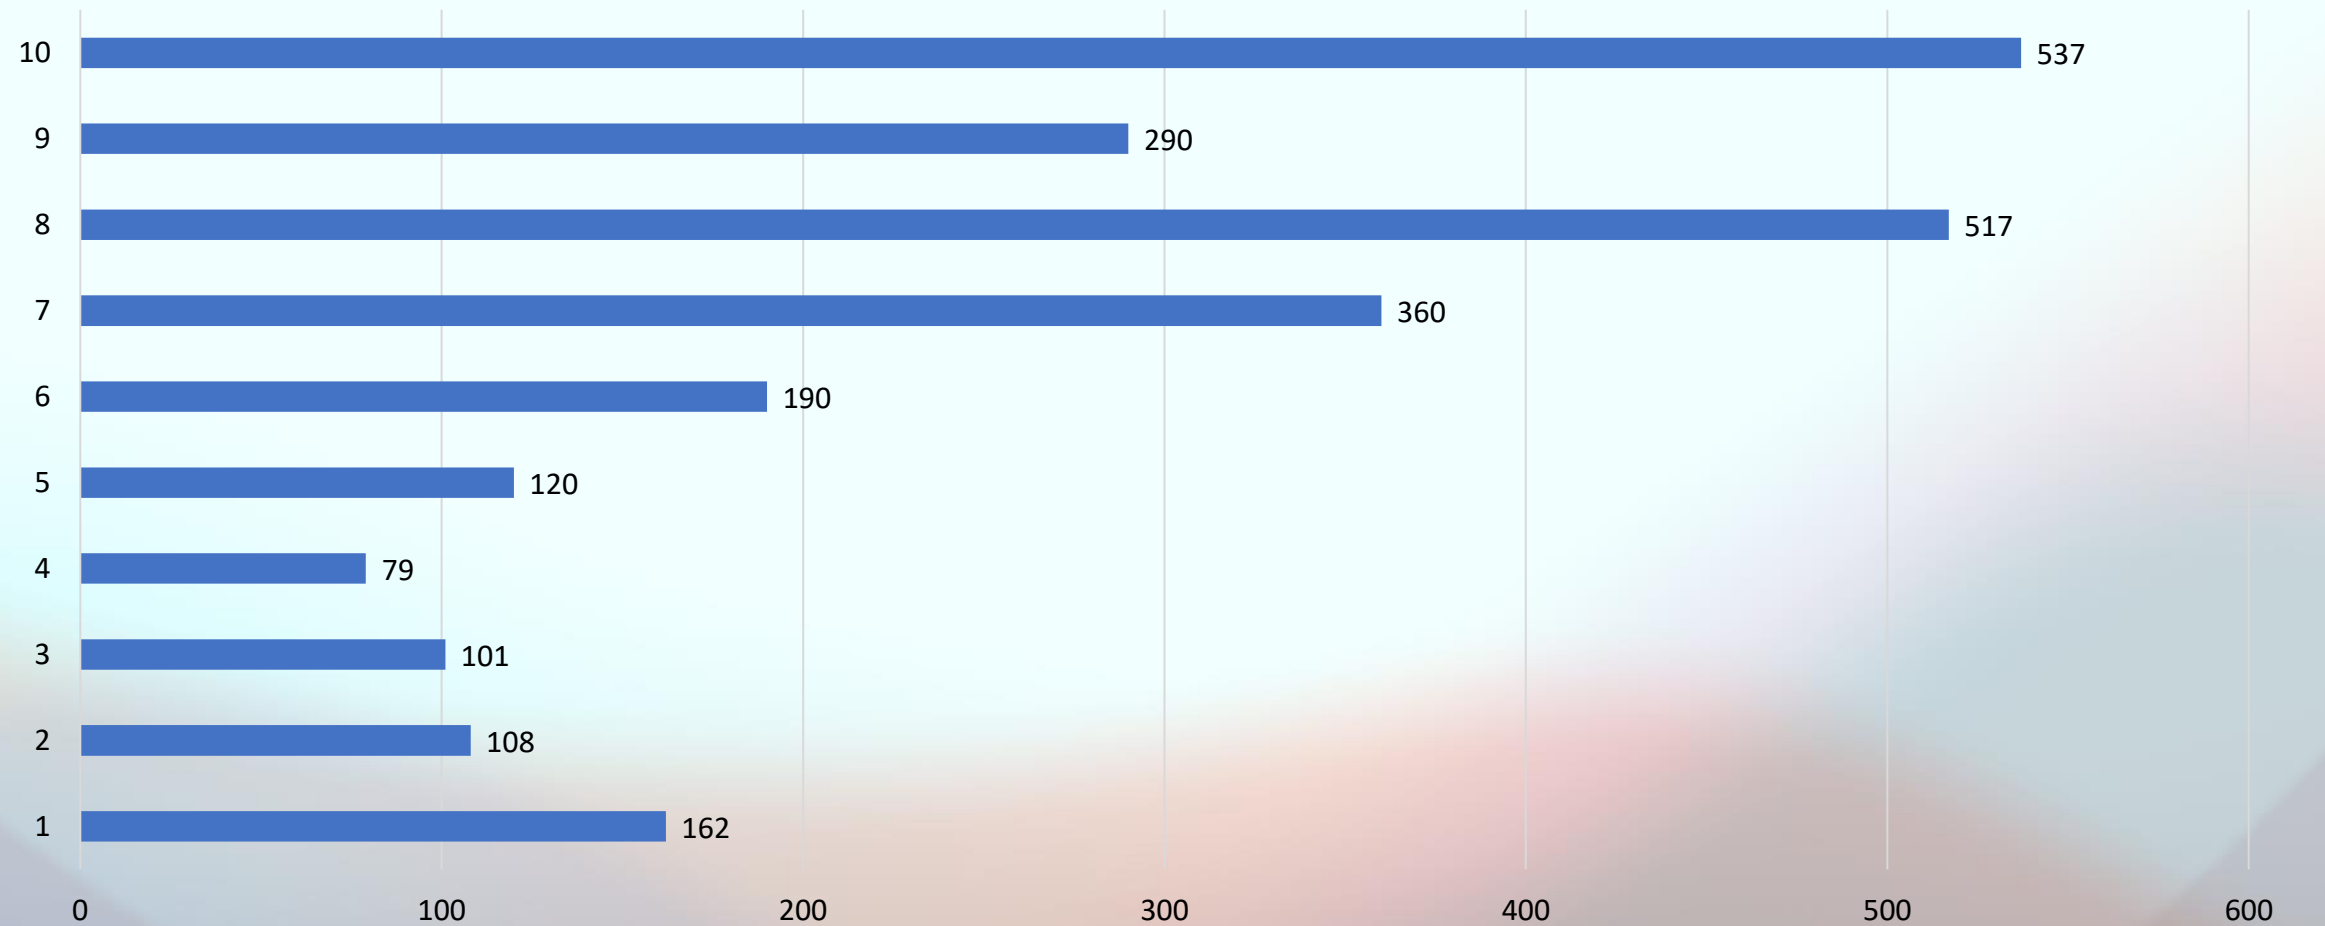

Total Responses: 2,438

Is aircraft noise a concern for you?

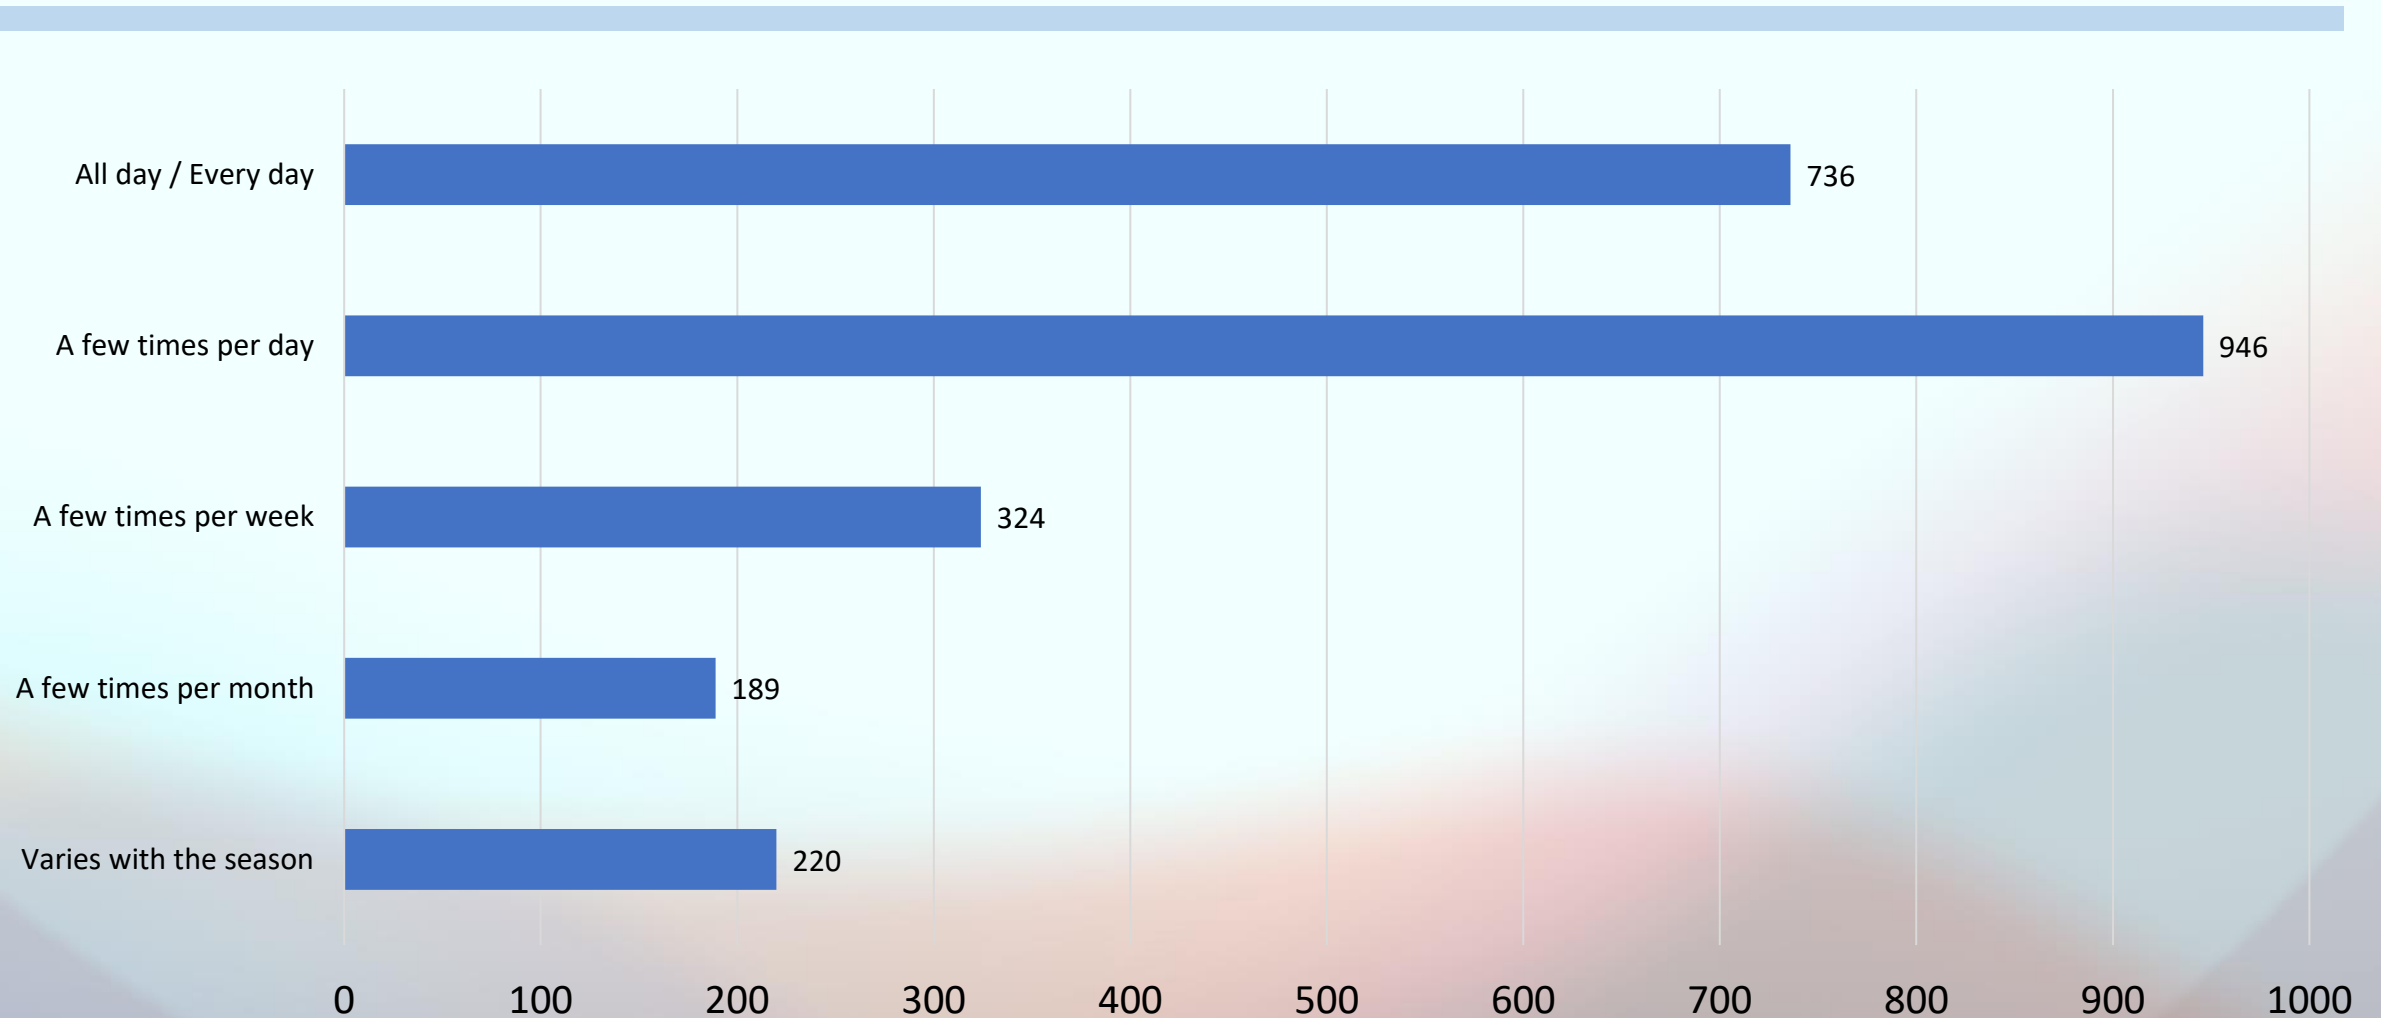

Total Responses: 2,436

One a scale from 1-10 how impacted are you by aircraft noise?

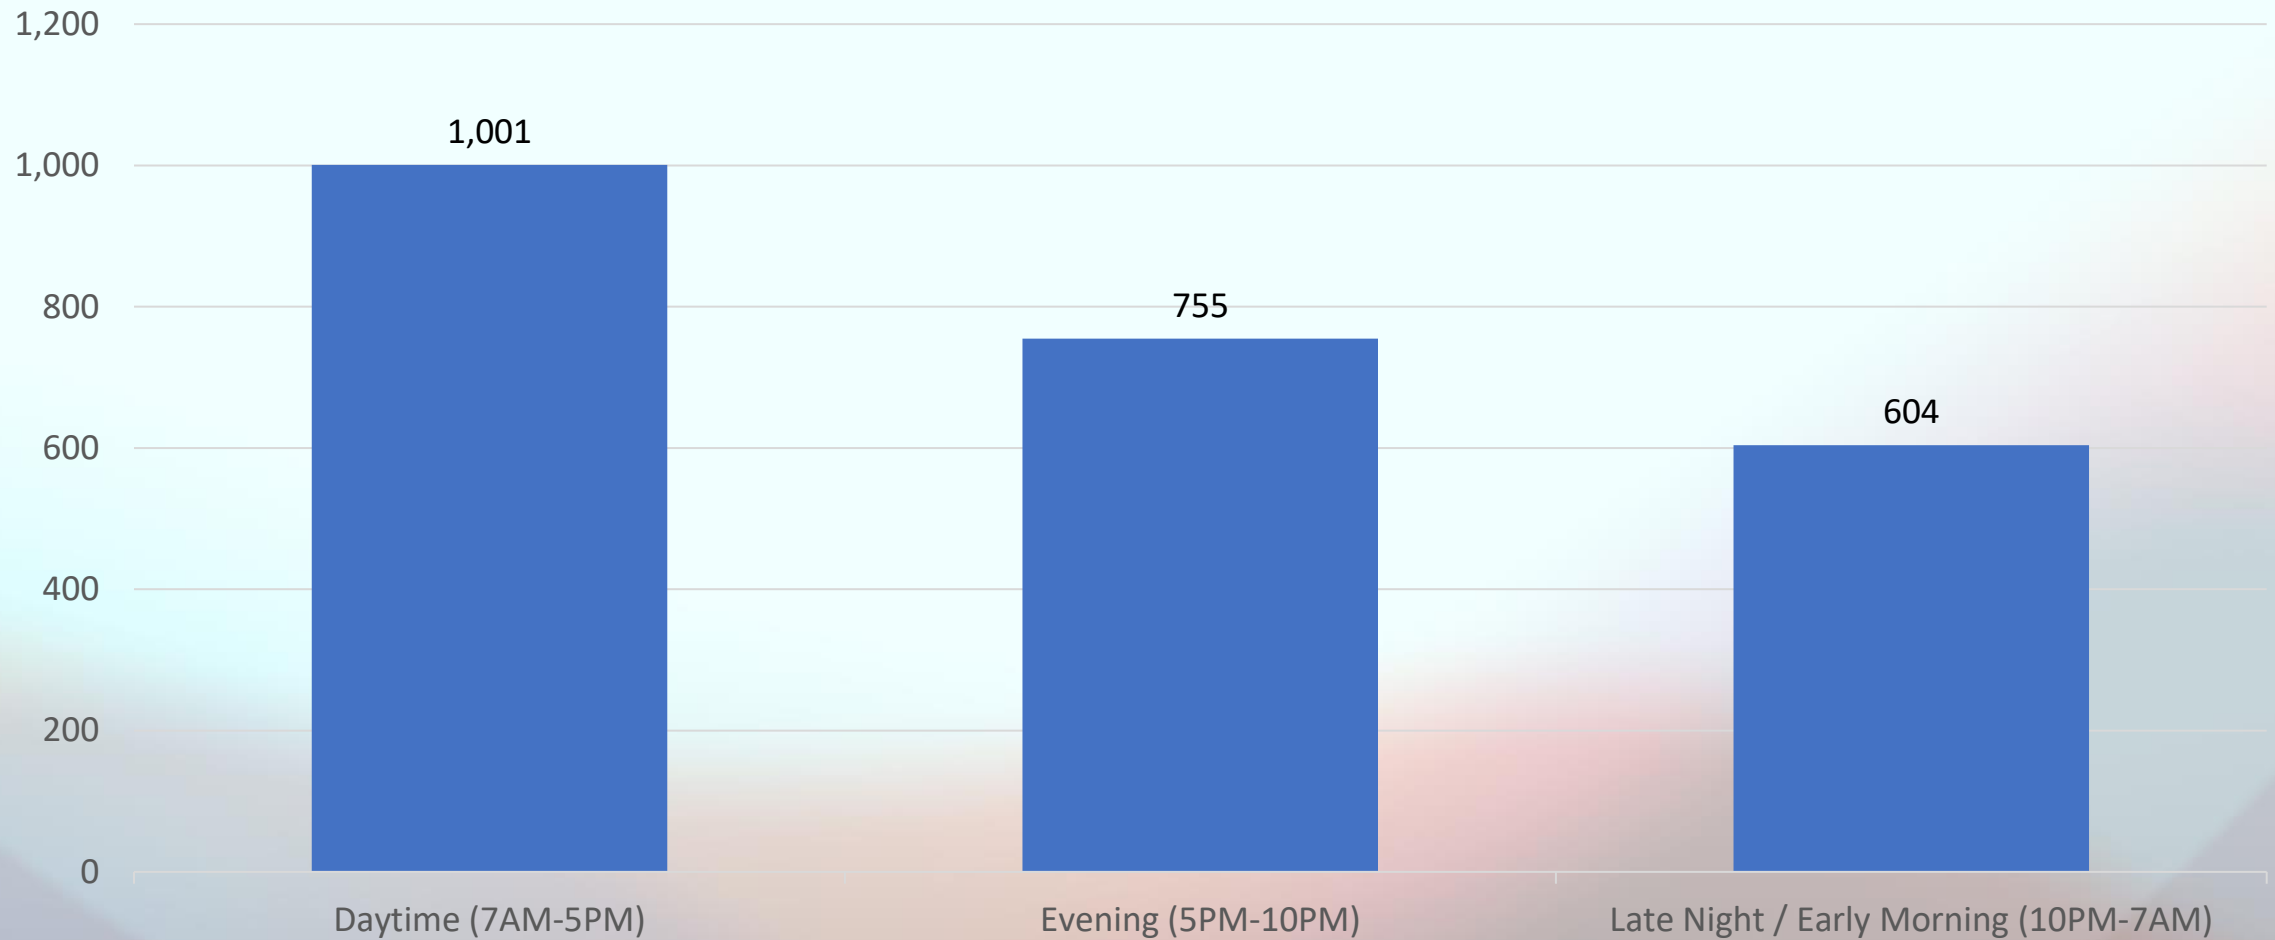

Total Responses: 2,464

How often are you disturbed by aircraft noise?

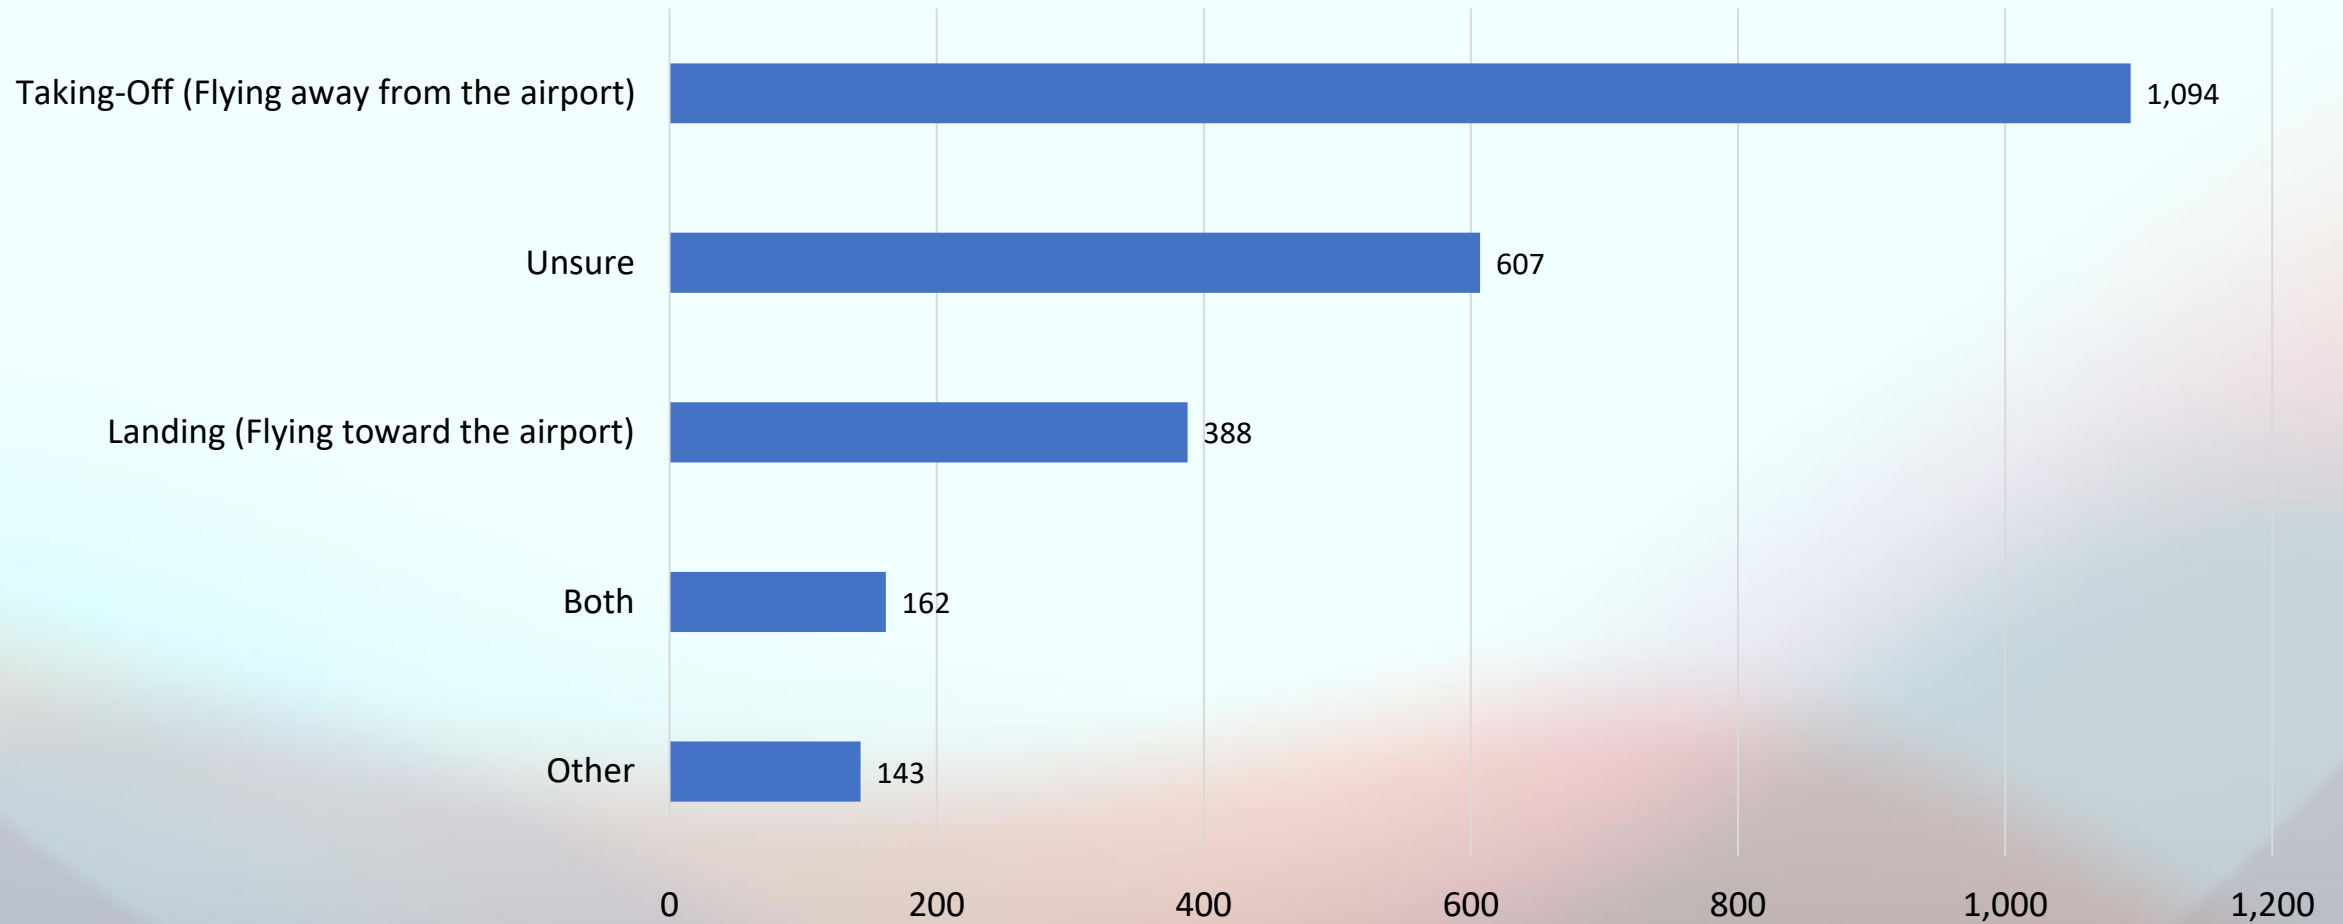

Total Responses: 2,415

During what time of day are you most impacted by aircraft noise? vianair

Total Responses: 2,360

Are you most impacted by aircraft taking off or landing?

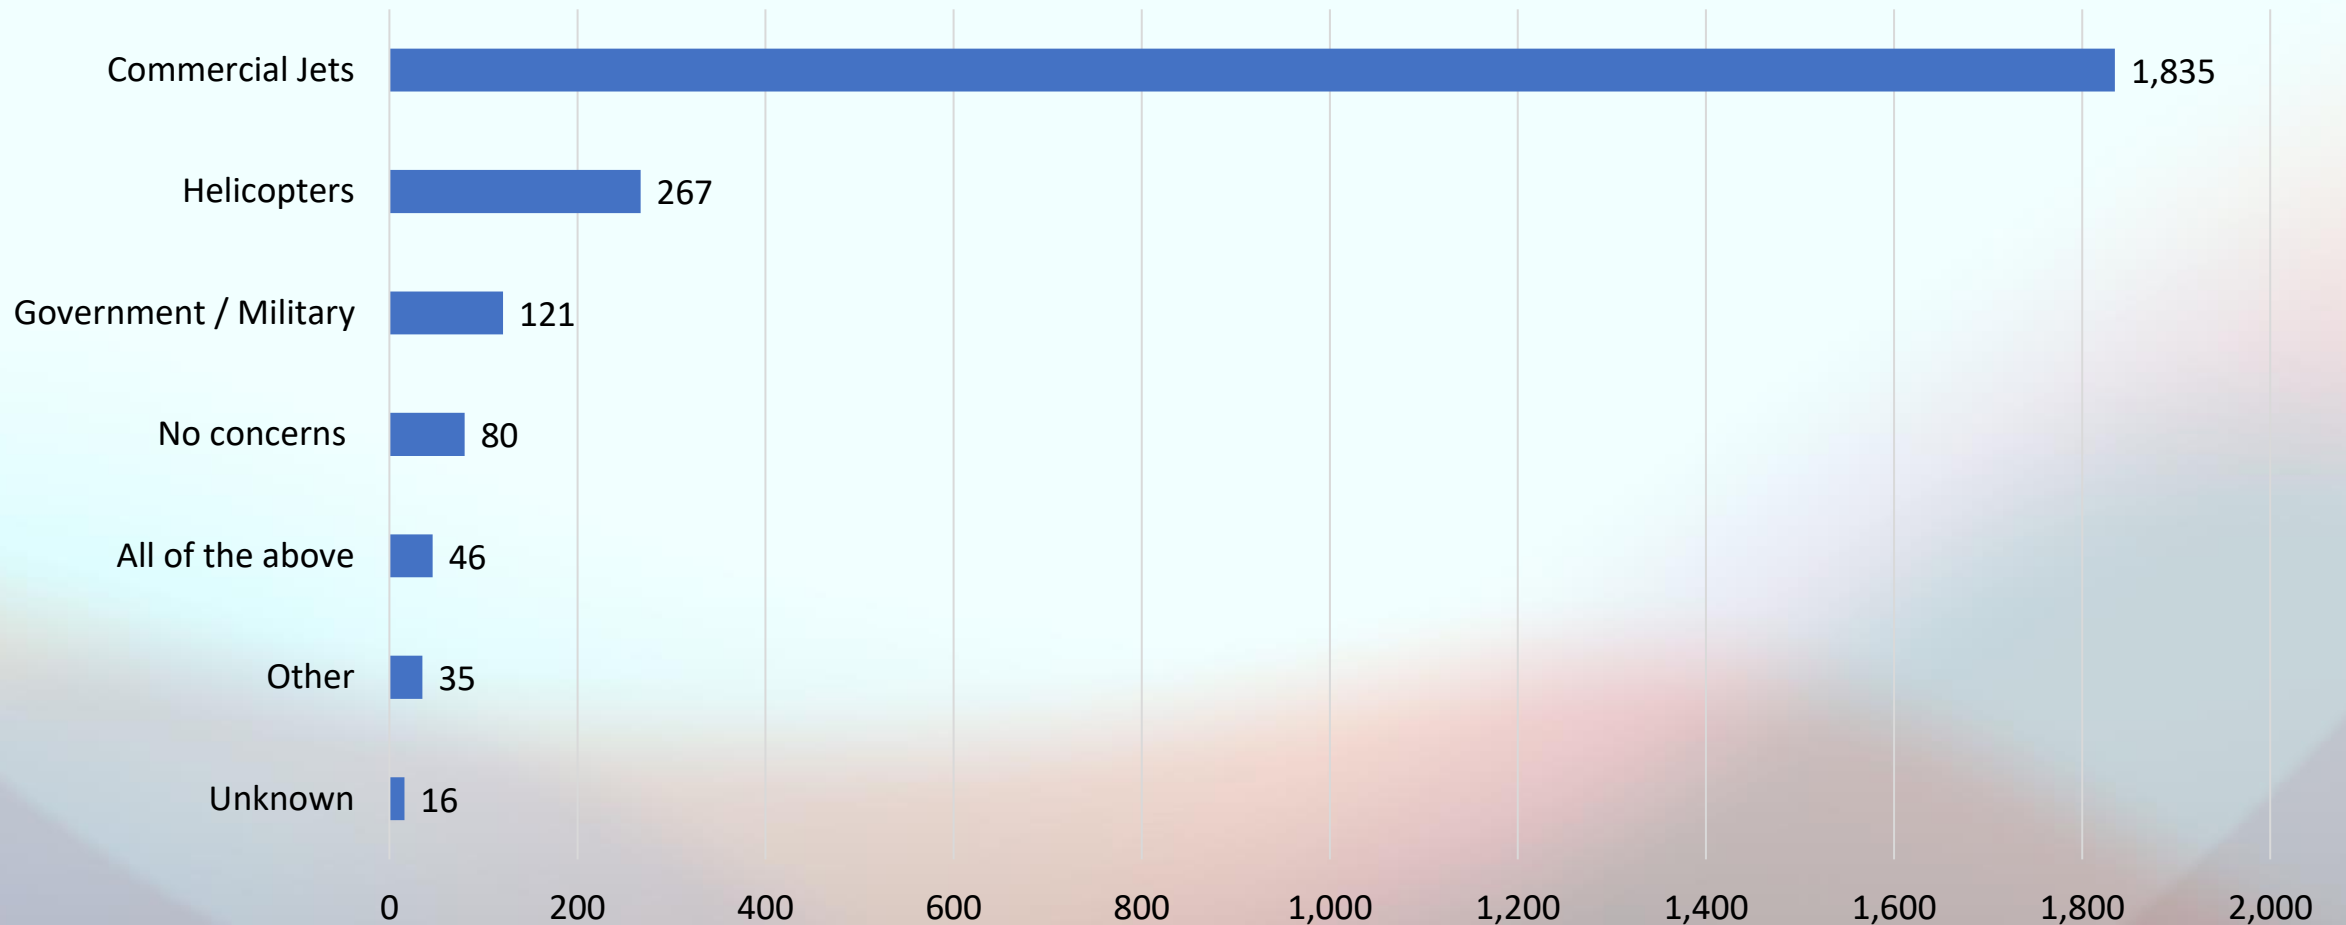

Total Responses: 2,394

What is your primary concern?

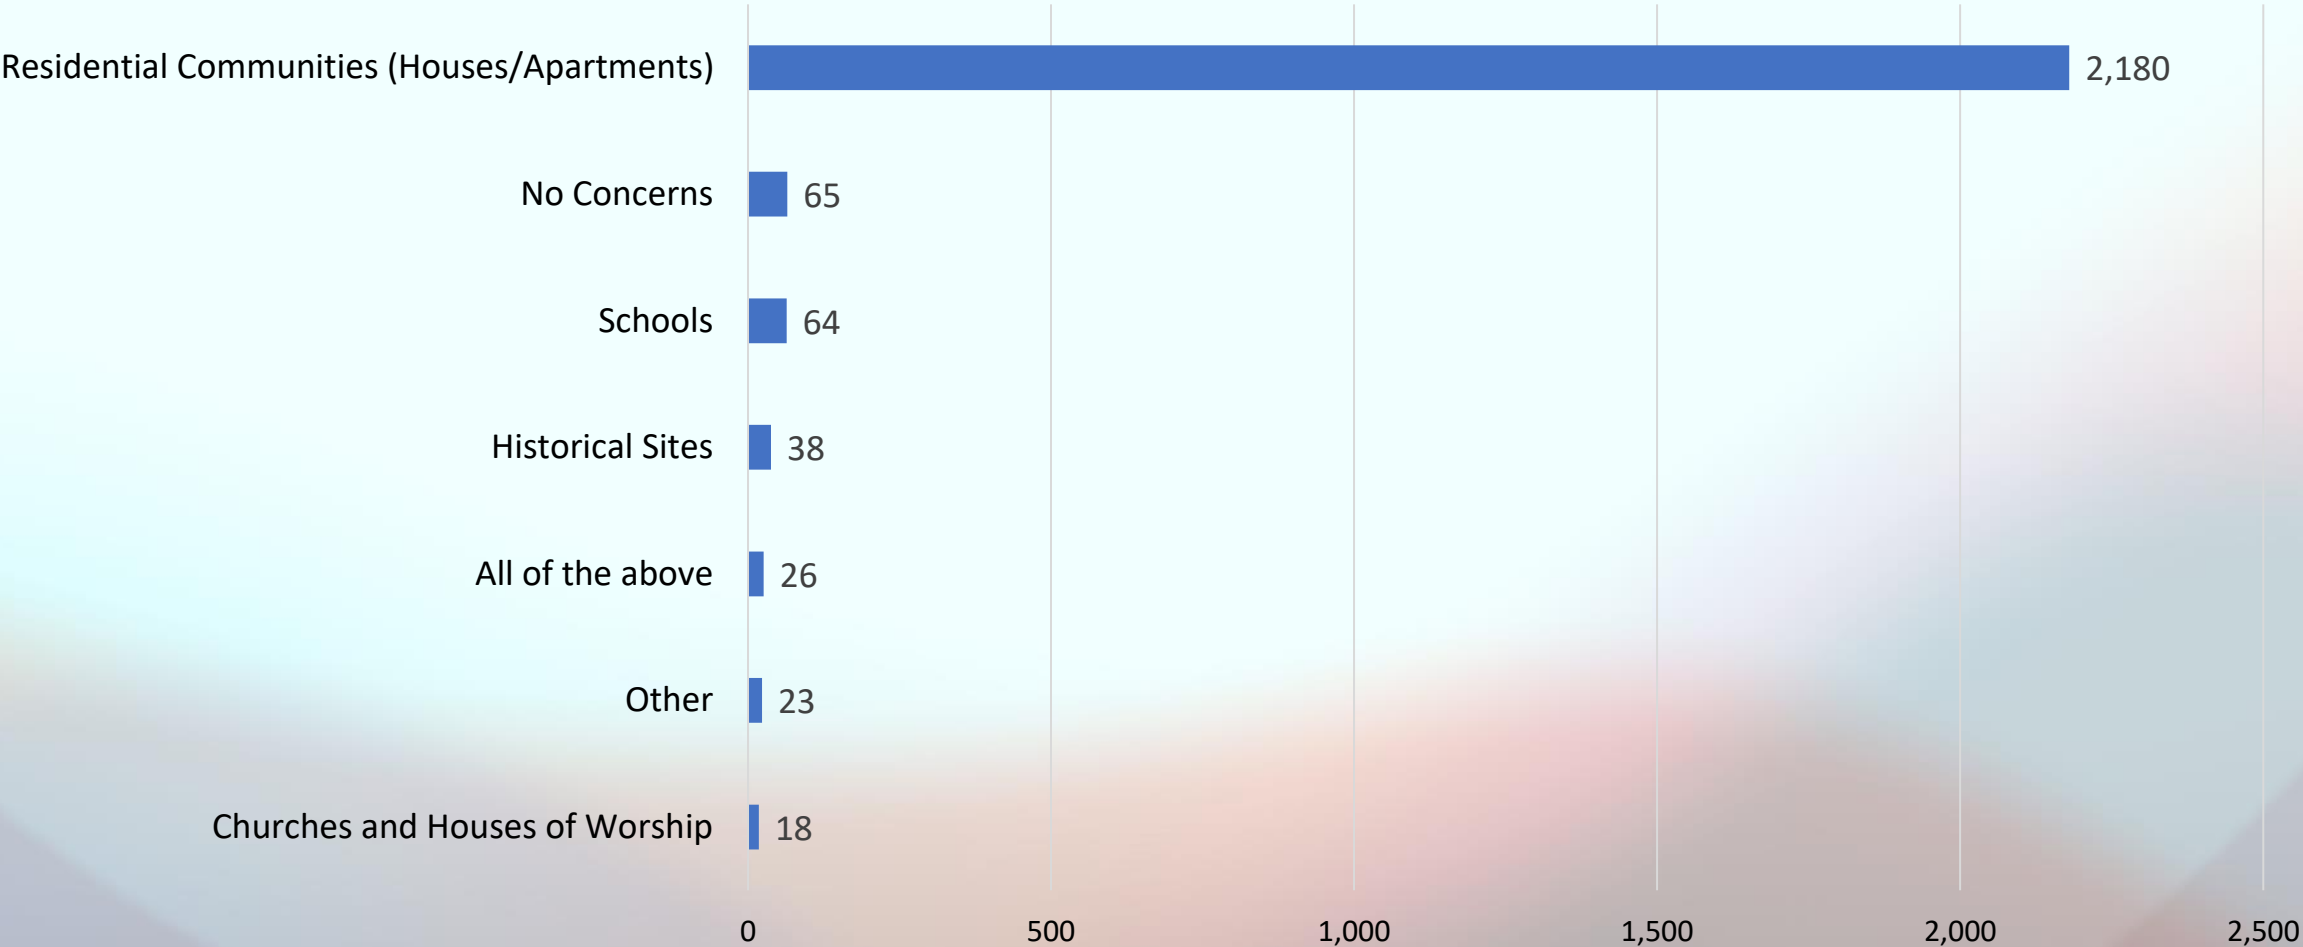

Total Responses: 2,394

What aircraft types cause the greatest impact for you?

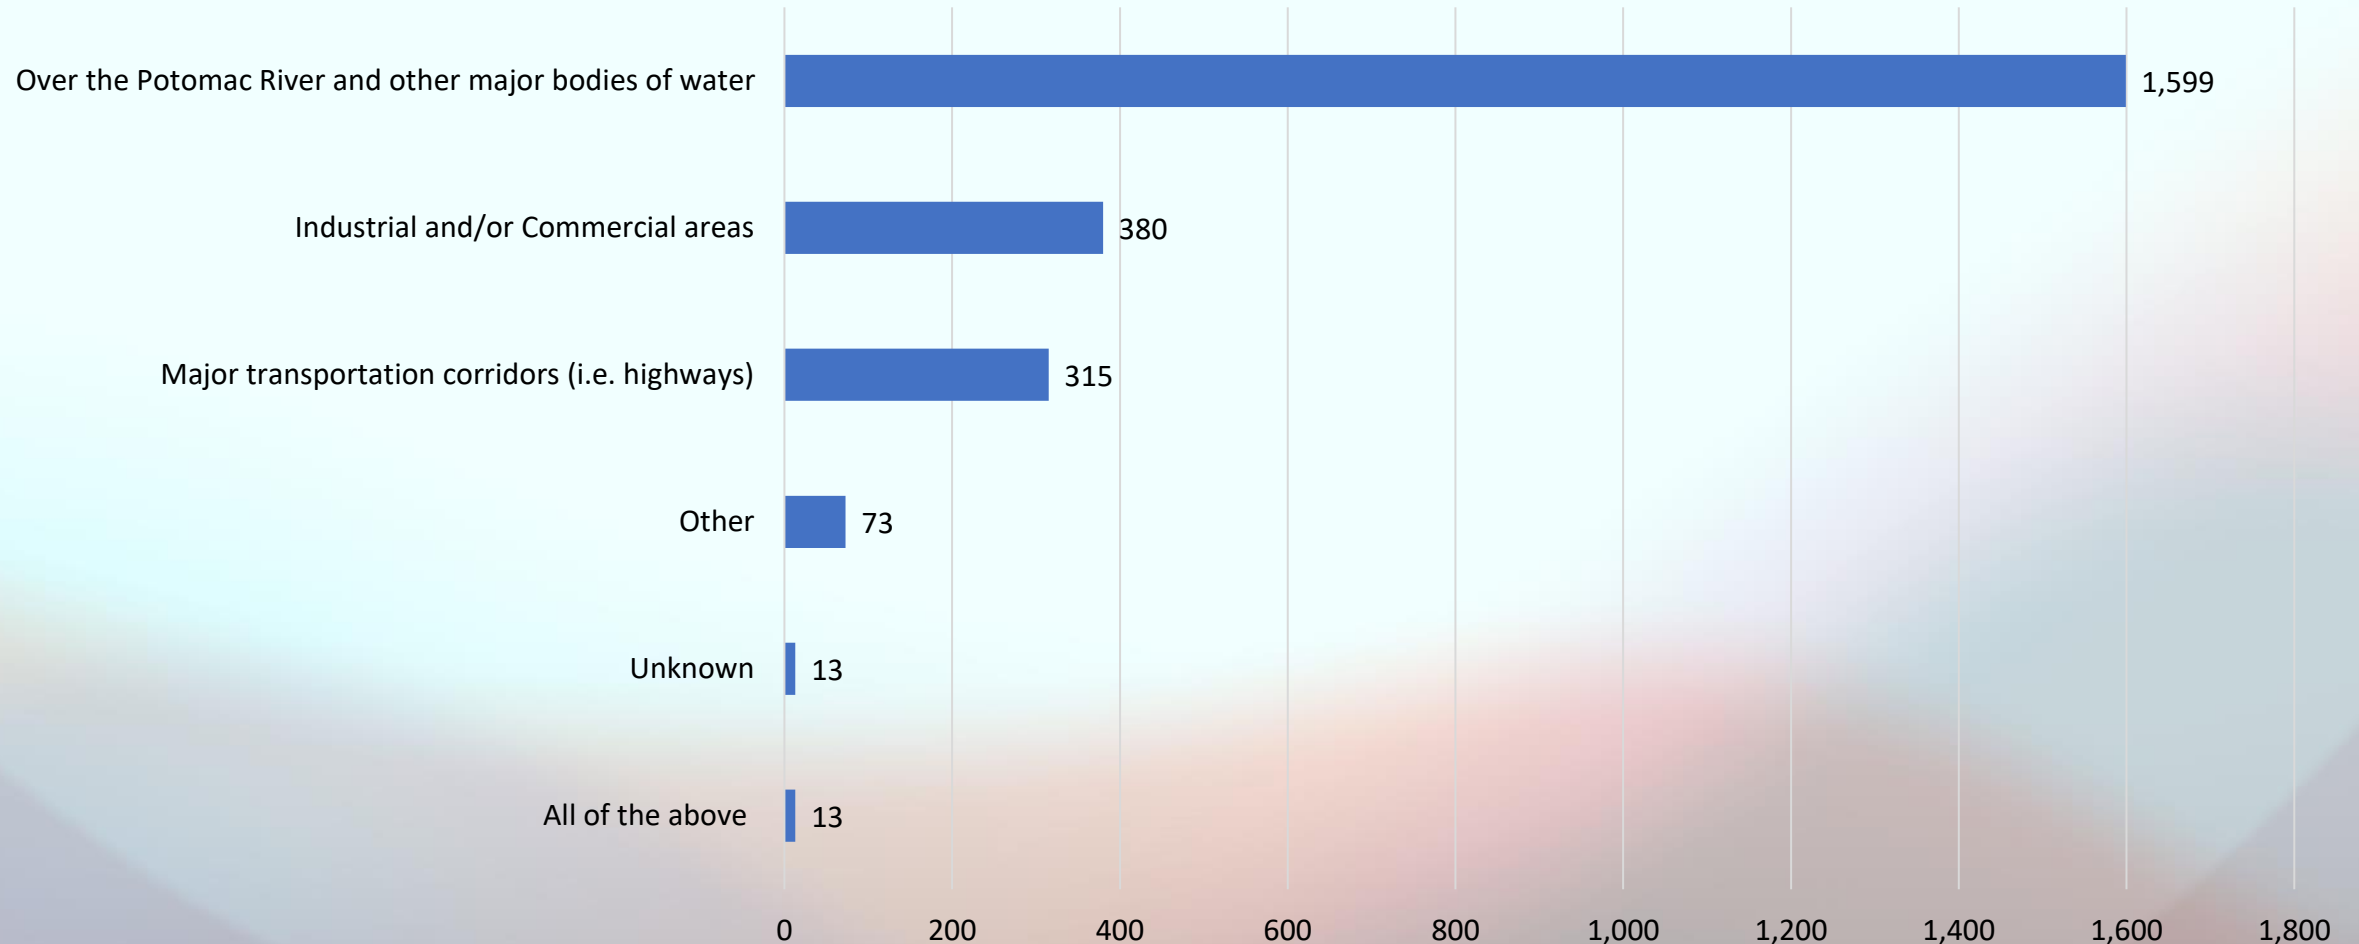

Total Responses: 2,400

Which areas should be the top priority for minimizing overhead flights / aircraft noise?

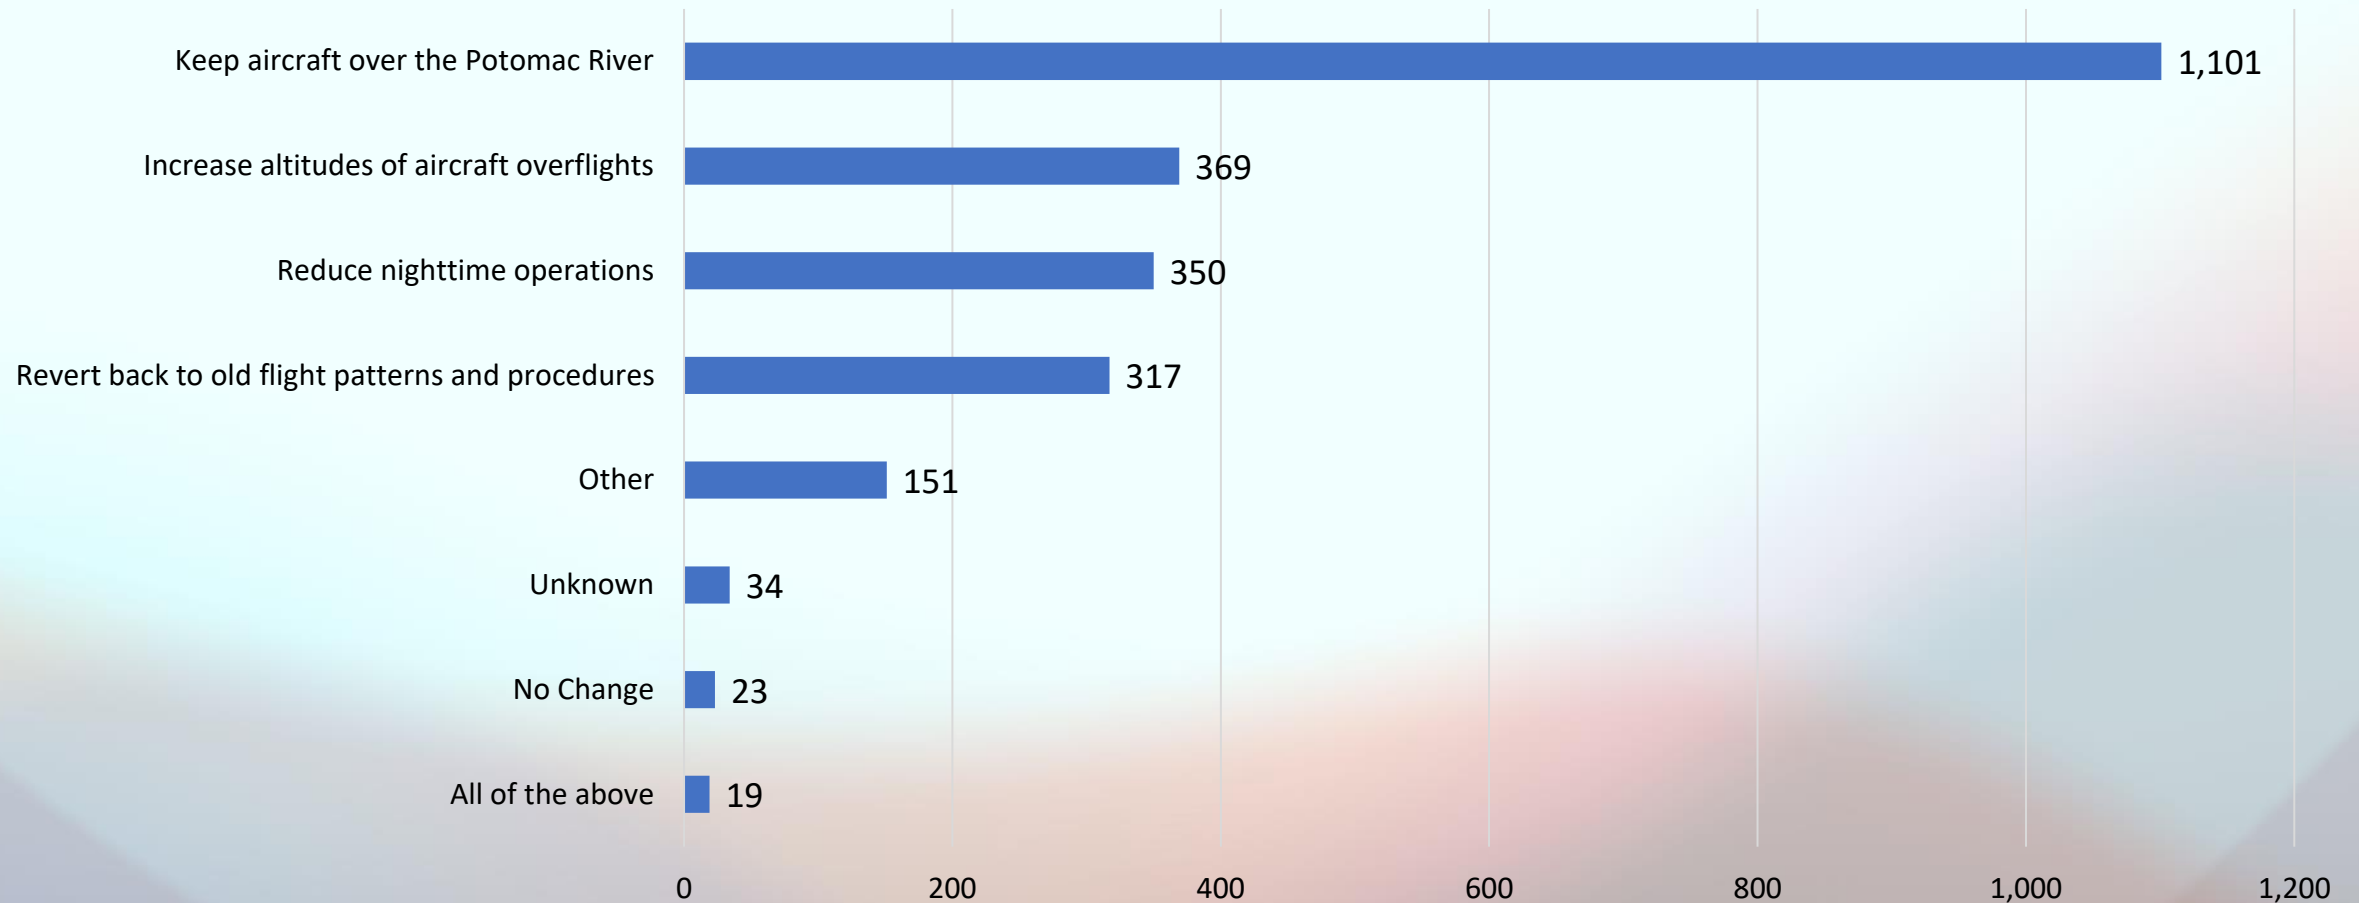

Total Responses: 2,414

Which areas are most appropriate for overhead flights/flight paths?

Total Responses: 2,393

What strategies would be the most beneficial for your neighborhood?

Total Responses: 2,400
