

# Stormwater Management

## AGENCY OVERVIEW

### Agency Description

The Prince George’s County Stormwater Management District (a special taxing district) was established to assume the stormwater management functions that were previously performed by the Washington Suburban Sanitary Commission. The Stormwater Management Division of the Department of the Environment is responsible for constructing and maintaining the Stormwater Management system in the County. It constructs facilities to alleviate flooding, rehabilitates storm drainage channels, designs and constructs wetlands and restores river and streambeds. The Department of Public Works and Transportation (DPWT) maintains and operates publicly-owned stormwater management and flood control facilities.

### Needs Assessment

Several factors are taken into consideration in developing projects for the CIP, including the following:

- Areas of new development which will increase the amount and velocity of stormwater runoff;
- Condition and age of existing systems and the need for corrective action;
- Recommendations of watershed management planning activities;
- Water quality and environmental impacts;

- Retrofit of existing development to mitigate adverse flooding and pollution impacts;
- Availability of State and federal grants; and
- Federal, State and local regulations for stormwater, wetlands, forest and critical areas.

### FY 2024 Funding Sources

- Federal – 19.0%
- Other – 31.9%
- State – 5.3%
- Stormwater Bonds – 43.8%

### FY 2024-2029 Program Highlights

- The County continues to implement federal and State mandates which address various stormwater quality improvements including impervious area and stream restoration.
- Continued implementation of the Clean Water Partnership (Public Private Partnership) to assist with meeting the federal and State mandates.

<b>NUMBER OF PROJECTS = 13</b>							

**Description:** This project provides funding for water quality measures including low impact development (LID), wetland creation, reforestation and stream channels and tributaries restoration in the Bear Branch sub-watershed and Patuxent River Watershed.

**Justification:** This project is a continuing effort to restore and improve the Bear Branch watershed, sub-watershed and the Patuxent River Watershed. Phase III of the stream restoration is proposed to restore the stream channel upstream of Phase II from Van Dussen Road to Contee Road. This restoration will include the main stem of the Bear Branch stream and multiple tributaries.

**Highlights:** The FY 2024 budget is targeted for phase III of stream restoration and water quality projects in the upper portion of the Bear Branch Watershed. Phase II of the project was completed in June 2022, a year ahead of schedule. Phase III design for the upstream channel commenced in FY 2023 and construction will be completed in FY 2027. Post construction monitoring of phase III will commence in FY 2025 and will continue for the next five years to meet the Maryland Department of the Environment (MDE) permit requirements.

**Description:** This program consists of flood protection and drainage relief projects for the College Park, Calvert Hills area and will address surface run-off causing home flooding, alleviate road flooding and correct residential yard drainage deficiencies. Also, this project includes municipal participation, storm drain acceptance projects and flood warning systems. Right of way from property owners directly benefiting from project improvements must be provided at no cost to the County. This project will fund the Calvert Hills Storm Drain Improvement Project and future strategies on adverse drainage and flood mitigation projects.

**Justification:** This program provides flood mitigation and drainage improvement to existing storm drain infrastructure and residential structures which cannot be corrected through the County's Department of Public Works and Transportation maintenance program.

**Highlights:** This project was originally a sub-project under the Flood Protection and Drainage CIP project. Construction continues in FY 2024.

**Enabling Legislation:** Not Applicable

**Description:** The Clean Water Partnership (CWP) launched in 2015 to improve the health of the County's waterways, reduce the costs of retrofitting and maintaining the County's stormwater infrastructure and optimize economic benefits to County's residents by developing local businesses that will form the backbone of the County's green economy. The goal is to improve water quality by retrofitting approximately 5,475 acres through 2024. The expanded program area of the CWP was added in 2018, funded from low-interest rate loans from the Maryland Water Quality Revolving Loan Program.

**Justification:** The purpose of the CWP is to assist the County in achieving compliance with §402(p)(3)(B)(iii) of the U.S. Clean Water Act and corresponding stormwater National Pollutant Discharge Elimination System (NPDES)/Municipal Separate Storm Sewer System Discharge Permit (MS4 Permit), which requires the County to complete restoration efforts of 20% of the County's impervious surface area.

**Description:** The Corp of Engineers (COE) County Restoration project involves the design and construction of environmental enhancement and flood control facilities within the County. Projects include ongoing planning and design for projects pertaining to quality measures implementation, wetland creation, stream channel restoration and fish blockage removal in the Anacostia River tributaries and from the Western Branch to the Patuxent River.

**Justification:** This project includes stream and water quality restoration efforts in which the County is participating with the US Army Corps of Engineers (ACOE). Funding represents the County's 'non-federal sponsor' share costs to be reimbursed to the COE. Projects other than those performed with the ACOE could receive funding through State and federal grants. 'Other' funds may also be secured from a transfer of stormwater management operating funds and fee-in-lieu payments.

**Highlights:** In FY 2024, construction and certification support continues on the Allison Street levee.

**Enabling Legislation:** Not Applicable

**Description:** This project will facilitate the design and construction of unanticipated projects which require immediate implementation, due to emergency conditions affecting the public health, safety or welfare and for matching funds for unanticipated grants in which funding is required to secure an agency grant.

**Justification:** Immediate action is often required to address emergency conditions arising from natural disasters such as a flood, slope failures or severe weather storm events. In addition, a matching source of local funds is often required for grants.

**Highlights:** FY 2024 funding is to address any emergencies that may arise.

**Enabling Legislation:** Not Applicable

**Description:** This project provides for the acquisition of residential properties within the 100-year floodplain and properties vulnerable to unforeseen natural conditions such as a slope failure or stream erosion.

**Justification:** This project will mitigate severe economic impacts associated with flooding events to commercial, industrial and residential properties. Acquisition of the most severely flood-prone properties will have a positive impact. Properties which are acquired are then evaluated for opportunities to implement wetland banking, stream restoration, flood mitigation, reforestation and/or green space opportunities.

**Highlights:** FY 2024 locations of residential properties within the 100-year floodplain and properties vulnerable to unforeseen natural conditions are yet to be determined.

**Enabling Legislation:** Not Applicable

**Description:** This program consists of flood protection and drainage relief projects that will address surface run-off causing home flooding, alleviate road flooding and correct residential yard drainage deficiencies. Also included are municipal participation, storm drain acceptance projects and flood warning systems. Right of way from property owners directly benefiting from project improvements must be provided at no cost to the County.

**Justification:** This program provides flood mitigation and drainage improvement to residential structures which cannot be corrected through the County's Department of Public Works and Transportation maintenance program.

**Highlights:** The FY 2024 budget includes funding for residential drainage improvements for various locations, meeting the criteria for CIP projects as guided by reported drainage complaints. 'Other' funding was provided from Ad Valorum tax contributions and State Revolving Loans.

**Enabling Legislation:** Not Applicable

**Description:** This ongoing program by the Department of Public Works and Transportation will redesign, reconstruct and rehabilitate major drainage and flood control projects throughout the County.

**Justification:** A number of flood control projects constructed prior to 1975 require modifications to correct structural deficiencies, improve flow capacity, alleviate environmental impacts and improve overall safety.

**Highlights:** In FY 2024, construction continues for various flood control projects.

**Enabling Legislation:** Not Applicable

**Description:** This project provides funding for countywide restoration of untreated impervious areas to meet the MS4/NPDES permit, Chesapeake Bay Total Maximum Daily Load (TMDL) and Local TMDL with water quality/urban retrofit Best Management Practices (BMPs), stream restoration techniques, and other multiple stormwater management retrofit approaches, within all watersheds of the County. Expected impacts from upcoming regulatory changes will require targeting restoration projects to specific water quality impairments, adding time and cost to the NPDES restoration timeline.

**Justification:** The Maryland Department of the Environment issued a MS4 permit to the County that mandates the requirements for impervious area restoration.

**Highlights:** Various projects will be constructed during FY 2024. The source of 'Federal' funding is from the American Recovery Plan Act.

**Enabling Legislation:** Not Applicable

**Description:** This project will provide the County's contribution for water quality best management practice costs for projects with M-NCPPC, Metropolitan Washington Council of Governments (MWCOCG), State Highway Administration (SHA) and municipalities. Additionally, this project enables the County's participation through agreements, which the County may enter with developers, to complete needed work in existing communities. These project opportunities may also be identified under the County's stormwater permit review process.

**Justification:** Opportunities to meet the requirements of NPDES/MS4 compliance and impervious restoration may take place, which would otherwise not result in the County receiving restoration credit if participation did not occur. This project also includes locations where County CIP projects are planned and may be implemented by developers on an accelerated schedule and lowered cost.

**Highlights:** FY 2024 funding continues to support various participation projects throughout the County.

**Enabling Legislation:** Not Applicable

**Description:** This fund will provide a source of additional appropriation for possible cost overruns of funded projects in the capital program and for new projects unforeseen at the time the CIP is approved. This project will authorize the County Executive to approve appropriation transfers up to \$250,000 to previously authorized projects. New project authorizations will require the approval of a majority of the Council.

**Justification:** Estimates used for programming could be lower than the final engineering design costs, land acquisition and construction costs due to unforeseen inflation and other issues which are difficult to forecast.

**Highlights:** 'Other' funds may come from transfers from projects having a balance subsequent to their completion or from stormwater operating funds.

**Enabling Legislation:** Not Applicable

**Description:** The project determines the condition of the storm drain system, which will provide a basis for a large scale repair of storm drain infrastructure throughout the County. Ponds identified as deficient will be corrected, constructed and landscaped. Several countywide initiatives are also funded here including Right Tree Right Place, Growing Green with Pride, tree plantings for water quality and a comprehensive street tree inventory.

**Justification:** The County's stormwater management infrastructure is aging and in need of extensive and expensive repairs. These initiatives will assess the condition of the existing infrastructure, improve and restore functional operation and design intent and enhance community participation with stormwater management (SWM) facilities.

**Highlights:** FY 2024 funding supports the reconstruction of drainage channels, culvert replacements and the Office of Storm Drain Maintenance pipe replacement and removal program.

**Description:** There are stormwater best management practice structures that have been identified throughout the County that are beyond a maintenance effort. These structures were permitted as publicly maintained but were not accepted into the public inventory. The structures will be removed and replaced or reconstructed to provide water quality and water quantity benefits to the County's NPDES/MS4 discharge permit.

**Justification:** This project is required to meet the requirements of the County's NPDES/MS4 permit for the maintenance of stormwater best management practice facilities.

**Highlights:** FY 2024 funding supports the removal, replacement and/or reconstruction of the stormwater BMP structures.

**Enabling Legislation:** Not Applicable
