Inspections and Enforcement
Permitting and Licensing Division

Variance Request
Guidelines

Owners/design professionals may request an alternative to the code, due to impractical or hardship concerns, utilizing the attached Application for Code Variance. Submit completed applications to:

Email: dpiebprd@co.pg.md.us
cc to: KJDurrett@co.pg.md.us
and to: CNMiller@co.pg.md.us

Explain concisely and completely the nature of the variance request. Provide comprehensive information on how alternative compliance and/or the intent of the code will be achieved. Document your case with plans (including construction type, use, and number of stories), details, technical data, etc., illustrating your proposal to provide an equivalent level of safety if the variance is granted. Note that the cost of compliance alone will not necessarily be considered a hardship. The granting of a variance is the solution of last resort, and approval is not guaranteed.

Once your application is processed, we will provide a written response. In addition, you may be contacted if a field inspection is necessary. Questions regarding this process should be directed to our office at (301) 883-5880.
