Quick Start Guide: Kiro App & AWS Builder ID

A step-by-step setup walkthrough to get Kiro configured on your local machine.

STEP 1: SIGN UP FOR AWS BUILDER ID

An AWS Builder ID is a free personal profile used to access select AWS tools and applications.

1. **Go to the AWS Builder ID Page:** Navigate to **profile.aws.amazon.com**
2. **Enter Email:** Type in your email address and click **Next**.
3. **Enter Name:** On the next screen, enter your full name and click **Next**.
4. **Verify Email:** Check your inbox for a verification code from AWS, enter the code on screen, and click **Verify**.
5. **Set Password:** Create a strong password and click **Create AWS Builder ID** to complete sign-up.

STEP 2: DOWNLOAD, INSTALL, AND SIGN IN TO KIRO

1. **Download Kiro:** Visit **kiro.dev** and select the installer for your operating system (macOS / Windows / Linux).
2. **Install the Application:**
   - **macOS:** Open the downloaded `.dmg` file and drag Kiro to your **Applications** folder.
   - **Windows:** Run the downloaded `.exe` installer and follow the setup wizard prompts.
3. **Launch Kiro:** Open the Kiro application from your local device.
4. **Sign In with AWS Builder ID:**
   - On the Kiro welcome screen, click **Sign in with AWS Builder ID**.
   - A browser window will open automatically. Enter your email and password created in **Step 1**.
   - Authorize the request when prompted to return to Kiro.

🎉 **You're all set! Kiro is now configured and ready to use on your device.**
